Home of Flowers,

SWANLEY,

KENT.

Dear Sir or Madam,

Again we have much pleasure in sending you our "Herald of Spring Seed Guide." We have been delighted to receive and appreciate the many letters from our clients, expressing their satisfaction of our "Golden Seeds" we had the pleasure of supplying both for exhibition and other purposes. The fact that our stocks have been selected and re-selected for nearly fifty years, is in itself a guarantee of the high class seeds we are in a position to supply our esteemed patrons. Our seeds are saved from calcareous soil which imparts a greater brilliancy of flowers, and sweetness of flavour to the vegetables they produce than that possessed by those obtained from other sources.

It is needless to say there are many cheap seeds offered, but it is obvious that little or no care can be bestowed upon their selection. Then why buy inferior seeds when by spending a little extra you can have the choicest of flowers and vegetables in your garden, to be the admiration of all your friends.

It will be noticed in Peas, Broad Beans and Onions that prices are higher than usual owing to the continued drought during last summer but their quality is up to the standard of excellency, although a few of the samples are somewhat smaller.

We take this opportunity of returning many thanks to our clients for their past patronage, and ask that they will continue to favour us with their orders, which will receive our personal and prompt attention.

In anticipation of your continued commands.

We are, Sir or Madam,

Yours obediently,

H. CANNELL & SONS.

Our Goods have
been Awarded:

GOLD MEDALS, GOLD CLOCK, . . .
SILVER TROPHIES, SILVER CUPS,
FIRST CLASS CERTIFICATES . . .
and DIPLOMAS all over the world.

NOVELTIES IN FLOWER SEEDS, 1912.

We have much pleasure in offering the following Novelties, which we can recommend as worthy of cultivation.

Antirrhinum, Cannells' Gem.—A very attractive and exceedingly pretty variety, compact habit, flowers rich lilac with white throat. Much admired by visitors to our Nurseries last summer. Height 1 ft. ... 1 0

Antirrhinum majus nanum Salmon Queen.—A beautiful salmon-rose colour in the semi-dwarf class ... 1 0

Antirrhinum majus grandiflorum Venus.—Flowers of a lovely pink shade on white ground set off by a pure white throat. The long stalks are thickly studded with flowers of the finest form ... 1 0

Per pkt.—s. d.

Artemesia saccorum viridis (Summer Fir).—A

new ornamental foliage plant, introduced from China. It is an annual, and forms pyramid bushes from 3 to 5 ft. in height. As a pot plant it is very pretty, and may be successfully grown in groups and borders similar to *Kochia scoparia*. The colour of the finely pinnated foliage is a rich dark green. The cut branches last a long time and may be used for wreaths, decoration, &c. ... 1 0

Celosia Thompsoni magnifica nana.—After long and careful selection the three varieties now offered have proved sufficiently constant and will doubtless be very much appreciated. Of dwarf compact habit, they are very effective for bedding.

Golden Yellow ... 1 0

Chamois Pink ... 1 0

Blood Red ... 1 0

Clarkia elegans fl. pl., Scarlet Queen.—The flowers are extremely double, and present when opening a glowing salmon orange which changes to an intense orange-scarlet; very distinct and remarkably pretty variety ... 1 0

Cyclamen Eileen Low.—The colour is a lovely shade of *Rose du Barri*, a tone of colour which so appeals to those of artistic taste, but the great attraction lies in the distinct blushing-white margin and blushing-white crest on each petal. 1s. 6d. and 2 6

Cyclamen persicum giganteum, Victoria.—The lovely margins of the fringed flowers displayed in the softest and richest colours give to this variety a most enchanting appearance, ranging from white with rose, rose with scarlet, and crimson with violet. The coloration of each variety corresponds well with the base of the flower ... 1s. 6d. and 2 6

ARTEMESIA SACCORUM VIRIDIS 'SUMMER-FIR.'

(Reduced size.)

CYCLAMEN PERSICUM GIGANTEUM VICTORIA.

(Flowers one-third natural size.)

DIMORPHOTHECA AURANTIACA HYBRIDA.

Our Annuals have received Highest Awards by the Royal Horticultural Society.

	Per pkt—s. d.
Dimorphotheca aurantiaca Hybrida —In habit, growth and foliage the new hybrids are like the parent <i>Dimorphotheca aurantiaca</i> . They vary in colour from the purest white to red and bluish tints, sulphur to golden yellow, beautiful salmon shades, and even varieties with different coloured zones. The brilliancy and rich diversity of colours have been much admired and as highly recommended as the original	1 6
Dianthus mirabilis fl. pl. albus —Beautiful constant pure white variety of the large-flowering double Japan Pink. The flowers have a bizarre form, their deeply laciniated petals terminate often in fine thread-like fringes	1 0
Eschscholtzia Fire Flame —The plants grow compact, generally upright, and produce flowers in the utmost profusion, which are wonderful in colour, being a rare combination of lemon-yellow and rosy crimson (not in stripes, but in a perfect blend); a really beautiful novelty	1 0
Gaillardia grandiflora Sibylla —Splendid large-flowering perennial Gaillardia, with bright crimson-red flowers, the petals of which terminate in white to light yellow points, contrasting thus in a peculiar manner with the dark red centre. Very effective for large groups or planting amongst trees and shrubs	1 0

GAILLARDIA GRANDIFLORA SIBYLLA.

MYOSOTIS STRICTA GRANDIFLORA FAIRY QUEEN.

Geum coccineum fl. pl. Mrs. J. Bradshaw —The flowers, which are of the brightest scarlet, are borne on strong stems, and measure $2\frac{1}{2}$ to 3 ins. across, are nearly double, with large waved petals of great substance. They retain their colour in the most brilliant sunshine, and stand well in water	1s. 6d. and	2 6
Godetia grandiflora carminea fl. pl. —The plants grow to a height of about 26 ins., of pyramidal habit. The numerous fine double flowers measure from 2 to $2\frac{1}{2}$ ins. across, and of a bright carmine colour, broadly edged with rose	1 0	1 0
Linaria macedonica speciosa —Handsome hardy perennial Toadflax from the Orient. The individual flowers, crowded in dense racemes, are 1 in. across, and nearly 2 ins. long including the spur, and present a clear citron-yellow with orange-yellow spot on the lower lip. If sown early it blooms freely the first year	1 0	1 0
Lotus peliorhynchus atrococcineus —Amongst the rich-flowering greenhouse plants of easy culture the pretty trailing <i>Lotus peliorhynchus</i> ranks with the foremost. The variety now offered will be a welcome addition to this class of plants. The flowers are very deep scarlet, which contrast well with the fine linear glaucous foliage	1 6	1 6
Myosotis stricta grandiflora Fairy Queen —A splendid addition to the pyramidal section of Myosotis. The flowers are light porcelain-blue, borne on slender but vigorous stems, and covered with its lovely-coloured flowers of really large size	1 0	1 0

Per pkt.—s. d.

Pansy Solfatara —The large flowers measure about 3 ins. across, and are of a delicate sulphur-yellow or primrose colour, each petal being marked with a very large deep blue blotch	1	6
Primula Malacoides —This pretty introduction is quite hardy when grown in a sheltered position out of doors, but is seen at its best when cultivated as a pot plant in a cool greenhouse. The flowers are of a delicate shade of lavender, produced in whorls on tall graceful spikes in great profusion	1	0
Pyrethrum, Comet-Flowered (<i>Roseum hybridum grandiflorum</i>)—A selection of the useful and extremely free-blooming perennial Pyrethrums. The flowers are large, either single or semi double, and of the most bizarre form, the petals being rolled, twisted or sometimes entangled together. The colours range from pure white through flesh colour and rose to brilliant carmine and blood-red, in choice mixture	1	6
Schizanthus retusus trimaculatus albus —New attractive variety of this showy annual, 1½ to 2 ft. in height. The petals of each flower bears on white ground a large pure golden yellow, somewhat lighter veined spot edged with pure white, thus presenting a three-blotched flower of characteristic marking	1	0

PYRETHRUM, COMET FLOWERED.

SCHIZANTHUS RETUSUS TRIMACULATUS

ALBUS.

STOCK, LARGE-FLOWERING WINTER, WHITE LADY.

Stock, Large-Flowering Winter, White Lady —Produces large and very double flowers of a lustrous snowy white, about 20 ins. high, arranged in remarkable handsome foliage. The plants throw up a massive central spike like that of a Tree Wallflower, and branching freely in candelabra fashion finally assume the shape of a pyramidal bouquet. Very early blooming and remains a long time in flower	1	6
--	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	---	---

SWEET PEAS.

Afterglow .—A most distinct flower and quite a new break in Sweet Peas, a very vigorous grower and nearly always four true <i>Spencer</i> blooms on a stem. The base of the standard is a bright violet-blue, shading to a glowing rosy amethyst, wings electric-blue. <i>Afterglow</i> caused more attraction at the N.S.P.S. Exhibition than any other variety	10 seeds	1	0
---	-----	-----	-----	-----	----------	---	---

Anglian Lavender .—A pinkish lavender, <i>Spencer</i> type. Mostly three or four flowers of immense size on each stem	20 seeds	1	0
--	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	----------	---	---

Anglian Pink .—Colour best described as apricot on cream, beautifully marked, a very strong grower. Much admired at all shows	15 seeds	1	0
--	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	----------	---	---

Anglian Orange .—Bright orange-rose self, beautifully waved, withstands very hot sun	10 seeds	0	6
---	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	----------	---	---

Arthur Green .—Standard dark maroon, wings maroon-violet	12 seeds, 6d. ; 25 seeds	1	0
---	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	--------------------------	---	---

Bertha Massey .—A most pleasing shade of pale mauvy-lilac, fine <i>Spencer</i> form, mostly four flowers on a stem. Awarded 1st prize at the N.S.P.S. Show, 1911	12 seeds	1	0
---	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	----------	---	---

Bertrand Deal .—A lovely pale rosy lilac of immense size	10 seeds, td. ; 20 seeds	1	0
---	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	--------------------------	---	---

Captivation Spencer .—Both standard and wings are well frilled and waved, borne on long stems the flowers are of a rich rosy wine-red throughout	12 seeds, 6d. ; 25 seeds	1	0
---	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	--------------------------	---	---

Charles Foster .—A great metallic opal-pink, delicately suffused pale Cattleya mauve. Award of Merit, N.S.P.S.	12 seeds	1	0
---	----------	---	---

Cherry Ripe .— <i>Spencer</i> type. Cherry-red or cerise, the best in this shade	10 seeds	0	6
---	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----	----------	---	---

Our Sweet Peas have gained numerous Gold Medals at the leading Shows.

NEW SWEET PEAS—continued.

		Per pkt.—s. d.
Dorothy —A giant rosy lilac self, the colour is quite distinct from anything seen in Sweet Peas, and will without doubt become a very popular variety on account of its pleasing and taking colour. It is of extraordinary size and well frilled,	10 seeds	1 0
Elfrida Pearson —A very large pale pink. The buds have a distinct tint of buff, and flowers are frequently produced with double standards	8 seeds, 6d.; 16 seeds	1 0
Juliet —A lovely refined flower, finely waved, best described as a combination of pale apricot on yellow ground.	15 seeds	1 0
Irish Belle, or Dream —A beautiful rich lilac flushed with pink, which gives a very distinct and soft tone throughout the entire flower; of true <i>Spencer</i> type	12 seeds, 6d.; 25 seeds	1 0
Lady Knox —Ground colour cream, standard edged buff, which flushes into the centre	10 seeds, 6d.; 20 seeds	1 0
Lady Florence Willoughby — <i>Spencer</i> type, a beautiful soft cream-pink; softer in colour and also a more refined flower than <i>Mrs. Routzahn</i>	10 seeds	1 0
Melba —A magnificent salmon-coloured flower slightly paler in tone than <i>Earl Spencer</i> . One of the most effective bunches for exhibition ever seen. Will require shading	6 seeds, 6d.; 12 seeds	1 0
Mrs. Cuthbertson —Standard rose-pink, white wings, slightly flushed pale rose	10 seeds, 6d.; 20 seeds	1 0
Mrs. Heslington —Lavender shaded mauve, perfect form	10 seeds, 6d.; 20 seeds	1 0
Orange King —A bright deep salmon self of the <i>grandiflora</i> type. Needs good culture and slight shading from the sun's rays	12 seeds	0 6
Pearl Gray —A most lovely and distinct shade that might be described as a pearl or dove-gray suffused with light rose, showing a trifle more of the delicate rose shading in the standard, true <i>Spencer</i> type	12 seeds, 6d.; 25 seeds	1 0
Queen Mary —Pale pink on cream; beautifully waved, mostly four flowers of immense size on a stem, very effective for table decoration		1 0
Rainbow Spencer —The ground colour is ivory-white, flaked and lightly streaked with rose, magnificently waved	15 seeds, 6d.; 30 seeds	1 0
Red Chief —A bright shining reddish maroon, very striking and almost a self, the base of standard showing a touch of orange. Makes a telling bunch for exhibition. <i>Spencer</i> type	10 seeds	1 0
R. F. Felton —One of the finest and strongest growing lavenders yet introduced, both for exhibition and garden decoration. Always plenty of fours of true <i>Spencer</i> type	6 seeds	1 0
Stirling Stent —A wonderful deep salmon colour, <i>Spencer</i> type. Awarded Silver Medal, 1910	12 seeds	1 6
Thomas Stevenson —Brilliant orange-scarlet, of true <i>Spencer</i> type, producing four large flowers to a stem. Withstands the sun better than others of this shade	15 seeds	0 6
Vermilion Brilliant —The most brilliant iridescent scarlet <i>Spencer</i> yet produced. When well grown the vines are strong, short-jointed, and very floriferous, bearing on stout stems, 12 to 15 ins. in length, three or four artistically placed flowers. Requires no shading	12 seeds, 6d.; 25 seeds	1 0

Mrs. H. C., Naini Tal, India. "Your seeds did very well last season. The Celery and Peas were specially fine, and I won a prize with a basket of vegetables, all grown from your seeds, at our local show."

J. R., Wakefield.—"I consider the quality of your seeds excellent, and shall give you my seed orders in future."

Mr. W. M., Boscastle.—"I have exhibited flowers and vegetables from your seeds at three local shows. From twenty-three entries I have won twenty-two prizes (thirteen firsts). Lots ask whose seeds I have to thank for all these successes."

T. M. S., Simla, India.—"I must mention that the *Nicotiana* and *Linaria* which you sent in February came up most vigorously. They have been much admired."

E. D., Raglan.—"The Celery plants I had from you are a treat to see, also the Begonias, one of the latter (a white) measures nearly 6½ inches across."

J. F. B.—"I am glad to say that since I have been getting seeds from you we have had abundant supplies of all sorts of vegetables, and our consumption here is no small matter."

NOVELTIES IN VEGETABLE SEEDS FOR 1912.

Per pkt.—s. d.
Cauliflower, Chastity—A splendid novelty of great merit. Produces large white heads, which are self-protecting and remain tender for a long time. It also attains its maturity in the North if sown in good time 1 0

Melon, King George—A variety which can justly be termed first class. It is beautifully netted, emits a rich aroma, and is particularly thick in the flesh. The colour is a rich scarlet-orange throughout, the outer skin being dark green. It is exceedingly juicy and of splendid flavour, and can be grown with or without heat 1 6

NEW MELON, KING GEORGE.

Tomato, Ailsa Craig—This is a cross between *Fillbasket* and *Sunrise*. The shape is perfection, hardly a single irregular fruit to be seen. It is an enormous cropper, with great ropes of fruit hanging down one upon the other ... 6d. and 1 0

Tomato, Jolly Boy—A cross between *Ailsa Craig* and *Hillside Comet*, and should appeal to growers of the latter who are looking for something better. It is a free setter, splendid shape, and very early. The objectional eye is not known in this variety, which quality should command high prices in market 1 0

Tomato, Kondine Red (Improved Tuckwood Favourite)—Produces heavier crops than any other variety. The fruit is of first-class quality, being of good colour, smooth, firm, and a good traveller 1 0

Our strain of Primulas are recognised by all as being the best.

"Gardening is an enjoyment and occupation for which no man can be too high or too low."—*Earl of Carlisle.*

Any of the above Collections, for a small additional cost, can be packed in hermetically sealed cases ready for sending abroad.

CANNELLS' VEGETABLE SEEDS.

FOR COLLECTION OF VEGETABLE SEEDS, See Previous Page.

CANNELLS' GARDEN PEAS.

All carefully selected and Hand-picked. Pints can also be supplied of all the Varieties in List.

CULTURE.—The earliest varieties may be sown about the second or third week in November, or first week in December, another sowing in January, and continuous sowings in the order they stand, every three weeks, up to the end of July. Sow in rows 4 to 7 feet apart (according to height, which varies wonderfully); when about 5 or 6 inches above ground, thin out if required, and properly staked. By sowing seeds of some of the early kinds in July, a late picking of Peas may be had until the frost sets in. The general height is here given of the various kinds of Peas, but of course, the season and richness of the soil will cause a difference. Our "One and Only Wash" is a complete eradicator of *Mildew* wherever it touches.

THE PILOT.

Section I.—EARLIEST VARIETIES.

	Height in feet.	Per qt. s. d.
CANNELLS' SELECTED ENGLISH WONDER —Difficult to beat as a dwarf wrinkled early variety	...	1½ 3 0
SCIMITAR TOM THUMB —This variety produces handsome curved pods containing 9 to 12 peas; useful for pot work	...	1
Laxtonian —One of the earliest Marrowfat Peas; pods large and well filled.	...	1½
	In sealed packets, 1s. 6d. each	—
Lord Leicester —Produces numerous pods of enormous size, 7 inches in length, which are filled with immense peas of the richest flavour, sweet and buttery, and of beautiful green colour; fine for exhibition. In season it closely follows <i>Gradus</i>	...	4
	per packet, 2s.	—
The Pilot —Deep green peas of exquisite Marrowfat flavour. Of hardy constitution, and may be sown during the autumn to obtain early results in spring. Award of Merit, R.H.S.	...	3 3 6
CANNELLS' ASCENDANT —Early marrow. Large fine-shaped well-filled pods early in the season; much admired; sturdy habit, and flavour all that can be desired	...	3½ 3 6
Gradus —Large-podded wrinkled variety, good for table and for show; pods well filled	...	3 3 6
Chelsea Gem —Compact, short-jointed habit; pods well filled; first-rate quality; wrinkled; adapted for forcing	...	1 3 0
Early Sunrise —A first-rate white wrinkled marrow, suitable for sowing late or early; fine flavour	...	2½ 2 6
May Queen —Dwarf, early, fine Marrowfat flavour	...	3 3 0
Wm. Hurst —A useful early dwarf kind	...	1 3 0
William the First —Most productive; rich, sweet flavour	...	3½ 2 6

Section II.—SECOND EARLY VARIETIES.

	Height in feet.	Per qt. s. d.		Height in feet.	Per qt. s. d.
Champion of England —One of the most useful. Very prolific, continuous bearer, and does best in light soils	5	3 0	Daisy —Excellent cropper. A grand dry weather variety; splendid table qualities	...	1½ 3 0
Laxton's Fillbasket —Very prolific, pods long and closely filled; a deep green; suitable for exhibition	3	3 0	Duchess —Heavy cropper; pods quite straight; splendid for exhibition	...	5 3 6
Prince of Wales —A first-class white wrinkled Pea of excellent flavour; good cropper	3	2 9	Perpetual Bearer —A great cropper and continuous bearer; valuable as a late variety; should be sown very thinly	...	3 2 9
Sharpe's Queen —A blue wrinkled marrow, pods large, and well filled; delicious flavour	2½	3 0	Yorkshire Hero —A superior wrinkled variety, compact habit, dark green foliage, flavour good	...	2½ 2 0
Stratagem —A dwarf wrinkled variety of robust habit with immense pods	2	3 0			

We can also supply other varieties.

The crop of Seed Peas is again exceedingly short and prices are likely to fluctuate as the season advances. We, however, have a good stock in hand, but can only bind ourselves to these prices as long as stock lasts. We therefore advise ordering EARLY.

CANNELLS' GARDEN PEAS.

Section III. — MAIN or GENERAL CROP.

CANNELLS' DWARF MAMMOTH MARROWFAT.

	Height in feet.	Per qt. s. d.
Quite Content—A cross between <i>Alderman</i> and <i>Edwin Beckett</i> . It rather resembles the former, but the pods are considerably larger than either parent. Pronounced as one of the finest ever seen per pkt., 1s. ; per $\frac{1}{2}$ -pint, 2s. ; per pint, 3s. 6d. 5 to 6		
CANNELLS' EYNSFORD BEAUTY—Fit for picking towards the end of June. Vigorous growth. Valuable as an exhibition and general main crop variety ... 4	3	6
Improved Autoocrat—Prolific. Should be sown early. Grand for exhibition ... 4	3	0
The Gladstone—Excellent cropper, pods very large and fine, delicious flavour, and a beautiful rich green. A fine variety ... 3 $\frac{1}{2}$ to 4	3	0
Magnum Bonum—Fine for exhibition; long well-shaped pods, and large peas of excellent flavour, dwarf in habit, well resists mildew, splendid for the table ... 3 $\frac{1}{2}$	3	6
Ne Plus Ultra—Still maintaining its position as a late variety and good flavour ... 5 $\frac{1}{2}$	2	6
CANNELLS' DWARF MAMMOTH MARROWFAT—Heavy cropping, dwarf, dark rich green; delicious flavour ... 3	3	6
Captain Cuttle—Distinct; an acquisition for late cropping and exhibition. Robust growing; should be sown thinly. One of the heaviest late croppers in existence ... 3 $\frac{1}{2}$	3	6
Dr. McLean—Blue wrinkled marrow, vigorous habit, immense pods; one of the best for main crop ... 3 $\frac{1}{2}$	2	6
Duke of Albany—An excellent cropper, and invaluable for exhibition ... 6	3	6
Telegraph—A distinct variety, and a strong grower ... 5	2	6
Telephone—A wrinkled variety, an immense cropper, peas very large and of exquisite flavour; fine for exhibition ... 5	3	0
Veitchs' Perfection—One of the best for the main crop ... 3	2	9

CANNELLS' COLLECTIONS OF PEAS.

Consisting of good and well-tried varieties, and ensuring a continuous supply throughout the season, all our selection.

6 quarts in 6 best kinds ...	16s. 0d.
6 pints in 6 , , , , ,	8s. 6d.

We are prepared to supply collections of Peas in different quantities according to requirements, and consisting of the best and most suitable varieties, at current prices.

We can supply at Advertised Prices other varieties of Peas not in this List.

CANNELLS' BEANS, BROAD.

CULTURE.—For an early crop, a sowing should be made of *Mazagan* in October or November on well-drained soil. The main crop should be sown in February, and others to follow up to the end of May. Sow in drills, about 2 inches deep, the beans to be 3 inches apart, and the drills 2 to 3 feet apart. To ensure well-filled pods it is a good plan to pinch off the leading tops as soon as the lower pods begin to set.

	Per quart—s. d.	Per quart—s. d.
CANNELLS' GREEN HERCULES—Delicately-flavoured, and a fine improvement. A most desirable and profitable variety ... 2 0		Giant Seville Long Pod—One of the longest podded beans in cultivation; good cropper, and of fine flavour ... 1 0
CANNELLS' CHAMPION LONG POD—A great cropper; of handsome shape and splendid flavour. For exhibition and table purposes it is unsurpassable ... 1 6		Harlington Windsor—The largest and most prolific Windsor Bean in cultivation ... 1 6
CANNELLS' EXHIBITION LONG POD—One of the finest and most productive; amongst the best for exhibition ... 1 4		Wonderful Long Pod—Very early; a good cropper ... 0 10
Early Mazagan—The best for the first sowing ... 0 9		CANNELLS' BROAD WINDSOR—Large, and fine flavour ... 1 6
		Green Windsor—Fine flavour. A grand improvement ... 1 6
		Beck's Dwarf Green Gem—An excellent dwarf sort; 1 foot high 1 6

Other varieties can be supplied.

The crop of Seed Peas and Broad Beans is again exceedingly short, and prices are likely to fluctuate as the season advances. We, however, have a good stock in hand, but can only bind ourselves to these prices as long as stock lasts. We therefore advise ordering EARLY.

CANNELLS' BEANS, TALL KIDNEY RUNNER or CLIMBING.

CULTURE.—Sowings may be made in April, under glass, and the plants put out about the middle of May where they are to stand. If, however, they are to be sown in the open ground, the first week in May and again in June and July. When thickly mulched and watered they will bear heavily. They should be occasionally topped, to induce side growth, and if possible stakes or supports of some kind should be used, as it allows of much finer growth and increased production of pods.

	Per quart	s. d.	Per quart	s. d.	
Scarlet Emperor —A grand variety for exhibition purposes, producing enormous pods, often measuring 15 inches in length	3 6	CANNELLS' 1st PRIZE SCARLET. Long pods, and tender flesh; a heavy cropper; an excellent exhibition variety	2 6
Ne Plus Ultra —One of the best for exhibition and main crop; pods of splendid form	2 6	Giant White —A wonderful cropper, long pods, which are very tender; a capital exhibition variety	2 0
White Czar —An enormous podded white runner Bean, very thick, fleshy, and almost stringless; flavour delicate	3 0	Painted Lady —Very handsome, scarlet and white flowers; very ornamental as well as useful	2 0
Tender and True —Grows 6 or 7 feet high, bears a tremendous crop of long, straight, fine pods, the quality being first class; seeds same shape and size as the <i>Canadian Wonder Dwarf</i> Beans	2 6

CANNELLS' BEANS, FRENCH or DWARF KIDNEY.

CULTURE.—Sow in boxes or pots in a frame for planting out, after being carefully hardened off at the end of May, and again, in the open ground, in May and June, and for late crops up to the end of July. For forcing purposes sowings should be made in pots, under glass, from December to April. The same applies to these as to Runners respecting mulching and watering in dry season.

	Per quart	s. d.	Per quart	s. d.	
CANNELLS' AVALANCHE —Dwarf, robust growing, one of the earliest, and the crop prodigious; fine flavour; distinct	2 0	Ne Plus Ultra —Distinct variety for early and general use; extremely productive, fine flavour	1 6
Canadian Wonder —Prolific; dwarf and compact habit, and pods being of splendid exhibition shape, great length, and delicate flavour	1 4		Earliest of All —Strong, vigorous grower; pods are long, broad, and fleshy; excellent flavour; useful for very early forcing or for general crop.	18 to 24 inches high	2 6
Negro Long Pod —Very fine cropper	1 4				

BEANS, WAX POD or GOLDEN BUTTER.

CULTURE.—Should be sown during March and April in boxes or pots under cover, transplanting into open ground when all danger of frost is over; or can be sown outdoors from May to the end of July. The pods are of a beautiful creamy colour, stringless, tender, and of a rich flavour. Should be boiled whole.

	Per quart	s. d.	Per quart	s. d.
Mont d'Or (Runner) —Long golden pods; tender and delicious	3 0	Mont d'Or (Dwarf) —Golden-yellow stringless pods of excellent flavour	2 0

RUNNER BEAN, CANNELLS' FIRST PRIZE.

ARTICHOKE (Globe).

CULTURE.—Sow in March or April in drills, 18 inches apart, and transplant 3 feet apart each way; or seed can be sown in a gentle heat, pricked off into small pots when large enough, gradually hardening them until the end of May, and then plant out in the beds already prepared for them. The first season they will only produce a partial crop; but as it is a perennial, after being once planted, the beds continue to bear for several years. So as to secure fine heads they require good treatment; the soil should be rich, deep, and moist, and protected in winter by placing straw, bracken, or other dry material closely round the stems. It is advisable to cut the plants down after the heads are taken.

Per oz.—s. d. | **Jerusalem Artichoke** (*Helianthus Tuberosus*), not being produced from

seed, Roots are offered on page 20.

CANNELLS' PERFECTION GREEN — A splendid selection, perfect formed heads and delicate flavour per pkt., 6d. 1 0 **Jerusalem Artichoke**—White skinned, see page 20.

Large Purple Globe—Very useful , 6d. 1 0 **Chinese Artichoke**, see *Stachys Tuberifera*.

The crop of Runner Beans is again exceedingly short, and prices are likely to fluctuate as the season advances. We, however, have a good stock in hand, but can only bind ourselves to these prices as long as stock lasts. We therefore advise ordering EARLY.

ASPARAGUS (Seed).

CULTURE.—There is no vegetable more delicious. Choose the highest and lightest ground in the kitchen garden, and stake out in September as per diagram, dig out to a foot deep, lay it on each side in the pathway, then wheel in 3 inches of good manure, fork this in about another foot, and if dug over deeply two or three times so much the better; on the top of this place a fair coating of rich soil and soot, and over this 3 inches of soil from out of the alley, then place one plant to every 9 inches, spreading the roots well out, covering them over with the finest soil, free from stones. For the top covering have 6 inches of light friable or even sandy soil. The first year make one cutting only, if the plants are three years old, the following winter add more fine soil, so that there is something like 9 inches of earth above the crown of the plants. Asparagus beds made in this way with a good coating of manure and a fair amount of salt and soot every other year cannot fail to give abundance of this succulent vegetable until the peas make their appearance.

	Per oz.—s. d.	Per oz.—s. d.
Connover's Colossal—Early, and very large 0 4	CANNELLS' EXHIBITION—This cannot be surpassed; of large size and equally as well adapted for exhibition as for general market garden purposes; delicate flavour, wonderfully productive
Giant—Good, for general use 0 4	per pkt., 6d. 1 0

Thousand-Headed—Withstands the most severe weather; it is beautiful and tender when cooked 0 4

CANNELLS' EXHIBITION—This cannot be surpassed; of large size and equally as well adapted for exhibition as for general market garden purposes; delicate flavour, wonderfully productive

per pkt., 6d. 1 0

BORECOLE, or KALE.

CULTURE.—For spring use sow about the middle of March or early in April, and in August for autumn and winter use, broadcast over a well-prepared bed, and cover lightly with fine soil. When the plants are large enough to be handled, prick out on another prepared bed, about 6 inches apart, and well water them. When strong enough, to be planted out, in their permanent quarters, about 2 feet 6 inches apart each way.

	Per oz.—s. d.
CANNELLS' WINTER GEM—Producing a quantity of side sprouts that continue in good condition for a considerable time without showing signs of injury by the most severe weather; delicious and tender,	per pkt., 1s. & 1s. 6d. —
Asparagus—A useful kind; very delicious and hardy 0 6

Improved Cottager's—Very hardy, and produces a large crop

... ... 0 6

Drumhead Kale—The outer leaves resemble the Kale, and the heart that of a Cabbage. Dwarf in habit, perfectly hardy, and a most useful winter vegetable

... ... per pkt., 6d. 1 0

Tall Green Curled—A useful variety

... ... 0 6

BEET.

CULTURE.—Sow the end of April on ground that has been deeply dug and well manured the previous year. At the time of sowing, the ground should be again deeply dug, and the seeds sown in rows a foot apart. It may be sown in drills drawn by a hoe, or by dibbling a few seeds in holes 1 inch deep and a foot apart in the rows; thin out, when the plants are about 2 inches high, to a foot apart where in drills, and where dibbled in holes draw out all except one.

Per oz.—s. d.

Dell's Crimson—Leaves of a dark bronze colour; very ornamental for the flower garden

... ... 0 9

Nutting's Dark Red—A splendid variety for general purposes

... ... 0 8

Ornamental Chilian (Dracæna Leaved)—Non-edible; for decorating shrubberies and the flower garden

per pkt., 3d. & 6d. 1 0

Spinach, or Perpetual Beet—Both stalks and leaves of this variety are used—the former should be served up as Asparagus, and the latter makes an excellent substitute for Spinach

... ... 0 6

Other Varieties can be supplied.

BROCCOLI.

CULTURE.—Early sowings may be made in February, under glass, followed by sowings in the open ground, middle of April and second week in May, for successional crops. When the plants are large enough, prick out into a bed 6 inches apart, and after they have acquired strength, transplant to a piece of ground that has been previously well dug and sooted, in rows 2½ feet apart and 2 feet distant from each other. As the plants advance in growth draw the soil around the stems, and give liquid manure occasionally. We strongly recommend a sprinkling of nitrate of soda which will be found to work wonders. It is advisable to cut the heads as soon as they attain the medium size.

Section I.—For Cutting from September to November.

	Pkt.	Per oz.
	s. d.	s. d.
Grange's Early White Cape—Fine for autumn use	4d. and 0	8 1 4

4 " " Other varieties can be supplied. See Plants, page 19.	2 6

BRUSSELS SPROUTS.

CULTURE.—Sow the seed between the beginning of March and end of April—the earlier the better—in drills, on a well-prepared bed, and cover thinly with fine soil. When the plants are 2 or 3 inches high draw out the strongest and transplant into another bed, 6 inches apart. In May or June plant 2 feet apart in the rows and 1½ feet between the plants in the rows. Ground should be prepared early, so as to allow the soil to become firm.

	Per oz.—s. d.
CANNELLS' MATCHLESS—An excellent variety, most reliable and useful kind, and from the seed we are sending out, saved from our improved stock; the one indispensable variety for keen competitive purposes, and also for general use and market garden requirements	per pkt., 3d. and 6d. 1 0
Cambridge Champion—The sprouts are firm and of excellent flavour, keeps well and one of the best for the table	per pkt., 4d. and 8d. 1 4
Aigburth—One of the hardest and most productive varieties in cultivation,	per pkt., 4d. 0 8
Scrymger's Giant—A superior and useful variety; compact sprouts of delicate flavour	— 0 6
Dalkeith—Robust habit, medium height, richly flavoured sprouts; a good market gardener's variety	— 0 8

Other varieties can be supplied. [For plants, see page 19.]

If our Golden Seeds please you, tell others—if not, tell us.

CABBAGE, GARDEN.

CULTURE—No better preparation of ground with a coat of manure can be made than in the lifting of early Potatoes, when such a piece of ground may be profitably utilised by them. Sow in March and April for autumn and winter use, and early in August for spring and summer cutting. The small early kinds do well planted in rows 18 inches apart and 15 inches between the rows; the larger-growing kinds require to be put 2 feet apart each way.

CABBAGE, CANNELLS' DEFIANCE IMPROVED.

CANNELLS' DEFIANCE IMPROVED—Has been carefully selected for years, and the most popular kind round this part of Kent, and from the many good qualities it possesses it is always spoken of as the most perfect variety. Its second crop of little side Cabbages are pictures of perfection and are delicious in flavour. The first time it was placed before the Royal Horticultural Society it was unanimously awarded a First Class Certificate.

Per pkt., 3d. and 6d.; per oz., 1s.

Per oz.—s. d.
FIRST CROP—The earliest of all pointed varieties. An ideal variety for the private garden, as it takes up but little room and produces solid hearts in a very short time. Per pkt., 1s.

Early Rainham—A most useful and early market variety ... 0 6

Improved Nonpareil—A fine dwarf variety, of excellent flavour. Comes in very early ... 0 6

Red Dutch—The best for pickling, splendid colour; a re-selected stock ... 0 8

Ellam's Early Dwarf—A great favourite with some as a Spring variety ... 0 8

Enfield Market—Very early and large; extensively used by market gardeners ... 0 6

Hardy Green Colewort—For late Autumn and Winter use ... 0 6

Mein's No. 1—A splendid variety, either for Spring or Autumn sowing ... 0 6

Myatt's Offenham—A well-known early variety ... 0 6

Rosette Colewort—Exceedingly delicious and very ornamental ... 0 8

Sugar Loaf—Conical shaped, of excellent flavour when cooked; very distinct ... 0 8

Tom Thumb, or Little Pixie—Suitable for Summer use ... 0 6

Wheeler's Imperial—Dwarf and very early ... 0 6

Other varieties can be supplied.

CARDOON.

CULTURE—Sow in April, and grow in trenches in the same way as Celery, allowing a little more room in between the plants.

Large Spanish—Cultivated for the mid-rib of the leaves, blanched like Celery; used for soups, stewing and salads ... per oz., 10d.

Buy Cannells' Golden Seeds.

CANNELLS' PERFECTION INTERMEDIATE CARROT.

CARROT.

Seed saved from Selected Roots only.

CULTURE. The French Scarlet may be sown in frames in December and January; in February succession sowings may be made on warm borders; in March, a large sowing may be made; and for general crop sow about the middle of April, either broadcast on beds or in drills. Preference should be given to the drills, as the crop can then more easily be kept clean. As soon as the plants are 2 or 3 inches high, thin out to 2 or 3 inches apart at the first thinning; after a few weeks give a final thinning to 6 or 8 inches distance, and the crop allowed to remain till it has perfected its growth in autumn. It will be found an advantage to mix the seed with a certain amount of soil so that it can be more evenly distributed.

Per oz.—s. d.

CANNELLS' WINNER—It belongs to the stump-rooted class and is of good colour and flavour. Flesh close in texture; a valuable kind for market purposes, and indispensable where a very early crop is wanted 0 8

CANNELLS' FIRST PRIZE—Habit robust, and grows to a good length; skin is very clean and of a deep colour. We have been selecting this for several years, and it is quite worthy of competing with any in commerce per pkt., 6d. 1 0

CANNELLS' PERFECTION INTERMEDIATE—A careful selection of Intermediate Carrot. Roots much longer than the old kind; fine shape; colour a beautiful bright red, of excellent quality, and good for exhibition purposes 0 8

Early Scarlet Nantes—A medium-sized variety 0 8

French Scarlet Horn—Very sweet, and fine for forcing 0 8

Selected Guerande—A French variety of merit, stump rooted, very broad, flesh tender, very little core 0 8

Improved Early Scarlet Short Horn—Very fine for summer use 0 8

Long Red Surrey—A valuable variety for deep soils 0 6

James' Improved Scarlet Intermediate—Good for shallow soils, large size, excellent quality 0 6

Field, Horse, or Cattle Carrots—A useful and profitable crop. All cattle like the roots. Seed should be sown about 8 lbs. to the acre. White Belgian, 4s. per lb.; Yellow Belgian, 4s. per lb. 0 4

Other varieties can be supplied.

COUVE TRONCHUDA, or PORTUGAL CABBAGE. BRAGANZA MARROW, SEA-KALE CABBAGE.

Should be sown in March and transplanted in May into rows 2 feet apart, or can be sown in July, keeping the plants in a frame during the winter, and plant out in May, it will then be ready for use in summer. The heart can be used in the same way as the Cabbage, and the thick fleshy mid-ribs of the largest leaves can be cooked like Sea-Kale.

per pkt., 3d. and 6d.; per oz. 0 10

CAULIFLOWER.

CULTURE.—Sow end of January or early in February in a frame on a slight heat, or in a house, so that the plants may be forward and hardened off by April, when a sowing may be made outdoors. From this sowing heads will be produced in July and August. To stand the winter, seeds should be sown about the third week in August. *Cannels' First-to-Cut, Early London, and Early Dwarf Erfurt* are reliable sorts. Select a sunny, well-drained spot for the seed bed, well work, and if at all heavy add a good dressing of fine sandy soil or old potting compost, after which the seed may be sown thinly and broadcast, and covered with fine soil. When the seedlings appear, apply an occasional dusting of soot and lime as a preventive against slugs. The strongest plants, when ready, should be dibbled out rather thickly in half-lights and cold frames, and the remainder left in the seed bed where they will frequently survive an ordinary winter. Finally, plant out in spring.

Per pkt. Per oz.

s. d. s. d.

CANNELLS' FIRST-TO-CUT—It still maintains its character as being the earliest of all; dwarf, medium-sized heads, colour good and of a most delicious flavour; a gem in sealed packets, 1s. and 1 6 —

CANNELLS' EARLY DWARF MAMMOTH—Fine as a forcing variety, or for the early crop outdoor; close, solid, and pure white heads 6d. and 1 0 1 9

Eclipse—A favourite in every garden where it has been cultivated. Can be had from August to Christmas, 6d. and 1 0 2 0

CANNELLS' AUTUMN GIANT—Distinct. The heads are beautifully white, firm and compact, and remain longer fit for use than any other kind 6d and 1 0 1 6

Late Metropole—Of robust habit, enormous size, and at the same time of excellent shape and delicate flavour. Requires strong soil, and on account of the weight of the heads it is often necessary to earth up the plants 1 0 —

Early London—Compact; very early 0 8 1 4

Early Snowball—Dwarf habit, with heads of medium size, very compact, and of good flavour 1 6 —

Early Dwarf Erfurt—The best of the earliest sorts. By occasional sowing a supply can be kept up until Christmas 6d. and 1 0 1 9

Walcheren—Good for general crop 4d. and 0 8 1 4

For Plants, see page 19.

CANNELLS' EARLY DWARF MAMMOTH.

Our Exhibits of Vegetables have been awarded Gold Medals.

CELERY.

CULTURE.—In February sow in heat; March and April in open border. Plant in April, May and July, from 2 feet 9 inches to 3 feet between the trenches. A coating of mineral manure to the bottom of the trenches with rotten dung from an old hot-bed, and well water in dry weather. However large Celery may be, it is of little value if disfigured by the ravages of garden pests. It is of the utmost importance that soot, burnt ashes, or even fine soil is banked closely round the stems; too much soot can hardly be used, both to keep away the celery-fly that works its way in and deposits its eggs between the two skins of the leaves, and also to keep slugs from injuring it.

RED VARIETIES.

		Per pkt.—s. d.
Eynsford Red —A grand acquisition for exhibition and table use. Continues quite constant; good strong habit, the stalks are large, thick and of excellent nutty flavour	... 6d. and	1 0

CORN SALAD OR LAMB'S LETTUCE.

Very useful during winter and spring for Salads, and especially when outdoor Lettuces are about finished, for which it is an agreeable substitute and change.

Per oz.—s. d.

Italian—Broad-leaved	0	6
----------------------	-----	-----	---	---

CRESS (Pepper Grass).

CULTURE.—Plain and Curled Cress should be sown weekly during the whole year, if a regular supply is required, the state of the weather regulating the method of sowing. As a rule, from November to March, a gentle hot-bed is the best. Australian Cress sown in the open border during March and April, and in cool and shady place in May, will produce crops in succession; and if sown under a north wall in September and October, with a little protection, will afford a supply during winter and spring. Water Cress may be easily grown in a damp and shady place, and on no account must suffer from drought. Sow in March and April.

HERBS, GARNISHING PLANTS, &c.

3d. and 6d. per packet, except where mentioned.

CULTURE.—Sow in pans in a cold frame about first or second week in March; afterwards transplant into prepared beds, or the seeds can be sown the first week in April on warm border or outdoors.

- b Angelica—For flavouring. Leaf stalks can be blanched and eaten as Celery, or preserved with sugar.
- a Anise—For seasoning and garnishing.
- p Balm—Aromatic plant. Used in salads, making Balm Tea or Wine.
- a Basil, Sweet } Excellent for flavouring soups and salads.
- a — Bush }
- p Borage—Used for summer drinks; excellent for bees.
- p Burnet—The young leaves have a fine flavour.
- b Caraway—Seeds used in confectionery, lower leaves can be put in soups.
- b Chervil, Curled—For salads.
- Chives—For soups and salads. Per pkt., 6d. and 1s.
- a Clary (*Salvia sclarea*)—For seasoning and soups.
- b Corn Salad or Lamb's Lettuce—A hardy, useful salad. Per oz., 6d.
- Dandelion—Improved large thick-leaved. Per pkt., 3d. and 6d.
- b Dill—Leaves used in pickles and sauces.
- p Fennel—For garnishing and fish sauce.
- p Horehound—For the cure of asthma; also for seasoning.
- Horseradish—See page 20.
- p Hyssop—Leaves and shoots used for pot-herbs, also medicinally, aromatic.
- a Ice Plant—Fine for garnishing.
- Indian Corn—See Maize.
- Kale—See Borecole.
- Lamb's Lettuce—See Corn Salad.
- p Lavender—Grown for its sweet-scented flowers. Used in saucers.
- p Marjoram, Sweet or Knotted } Used in soups and stuffings, also when dry for winter use.
- p — Pot or Perennial }

EGG PLANT.

Per pkt.—s. d.

Cardinali—Median-sized oval-shaped fruits, bright scarlet 3d. and 0 6

Black Pekin. White. New York Purple. Mixed.
Each, per packet, 3d.

ENDIVE.

CULTURE.—For autumn use sow end of April or during May, on prepared soil, in drills a foot apart, and thin out to 6 inches from plant to plant; water in dry weather. If a winter and early spring supply is needed, sow in July and August, and transplant to frames, or a sheltered position, secure from frost.

Per oz.—s. d.

Cannells' Green Curled	—	The one mostly cultivated for general crop; very crisp and hardy	0	6
Moss Curled	—	Beautifully curled, like Moss	0	8
Green Batavian	—	Largo and fine	0	8
Improved Round-leaved Batavian	—	Very compact; forms a nice heart, blanches easily	0	8
White Curled	—	Very tender when young	0	9

GARLIC, see page 20.

GOURD, PUMPKIN OR SQUASH.

CULTURE.—Same as Vegetable Marrow. Some of the ornamental varieties can be trained over arches, &c.

Per pkt.—s. d.

Hubbard Squash	—	Iron olive-green, useful	0	6
Cucumis Erinaceus (<i>Hedgehog Gourd</i>)	—	Bristly green	0	6
— Grossularia (<i>Gooseberry Gourd</i>)	—	Green, striped grey	0	6
Cucurbita Maliformis (<i>Apple Gourd</i>)	—	0	6
Depressa Striata	—	Olive-green, striped with silvery bands and marbled with grey; can be sliced up and used in salads	0	6
Lagenaria (<i>Hercules Club</i>)	—	Nearly 3 ft. long	0	6
— (Bottle Gourd)	—	Creamy white	0	6
Turk's Cap (<i>Cottage Loaf</i>)	—	0	6
Cannells' Hundredweight, or Mammoth	—	The largest in cultivation, often attaining an incredible weight	0	6
Ornamental Mixed	—	Many curious and pretty kinds	0	3

A collection of 12 varieties, 2s. 6d.

p Rosemary—Sprigs for garnishing; leaves for making a drink to relieve headache.

Rampion—For salads

p Rue—For garnishing; also useful for poultry. A medicinal herb.

p Sage—For stuffing and sauce.

a Savory, Summer }

p — Winter } For seasoning; also useful in a dry state for winter.

p Sorrel—Used like Spinach; also in soups and salads.

Tarragon—Used for flavouring in soups.

p Thyme—For soups and seasoning, also stuffing.

p Wormwood—Used as a tonic when taken in tea.

a Annual.

b Biennial.

p Perennial.

For Plants, see page 20.

KOHL RABI (Turnip-rooted Cabbage).

It likes a good, enriched soil, and should be sown from March to June in drills two feet apart and thin out to one foot between plants, or can be carefully transplanted into rows the same distances as above.

Per oz.—s. d.

Early Green Vienna } Speciaily selected for kitchen garden
Early Purple Vienna } purposes 0 8

We can also supply the large green Kohl Rabi for agricultural purposes, 3s. per lb.

We export to all parts of the World.

LEEK.

CULTURE.—For an early crop sow in a pot, pan, or box early in February, and place in a frame or a slightly-heated place, and when the plants are 3 or 4 inches high, prick out in a sheltered position or frame in rich soil. Here they are to remain until good-sized plants are formed, and then transplanted to their permanent quarters. Leeks of very fine quality, and good enough for ordinary use, may be obtained from seed sown the first week in March, broadcast, on a warmer border, and cover lightly with mellow soil. Transplant, when large enough, in rows 18 inches apart, and about 8 inches in the row. Prepare trenches and earth up in the same way as Celery. Use mineral manure.

	Per pkt.	Per oz.	s. d.	s. d.
CANNELLS' MAMMOTH—A superior kind, very hardy, blanches well, and grows to a large size; a splendid exhibition variety	4d. and	0 8	1	4

Champion—This Leek has gained many honours 6d. and 1 0 1 6

The Lyon A thoroughly distinct variety, matures early, grows to a great size and weight without coarseness.

The white part, when blanched, often exceeds 16 inches in length and 9 inches in circumference ... 6d. and 1 0 1 6

Giant Ayton Castle—A very large and fine variety, 3d. and 0 6 1 0

Musselburgh—Large Scotch; finest stock ... 3d. and 0 6 1 0

Other varieties can be supplied. For Plants, see page 19.

LETTUCE.

CULTURE.—Sow from the first week in March till September for succession. When 3 inches high, remove the strongest plants to prepared ground, and plant them in rows from 1 to 2 feet apart, according to size. For spring use sow in autumn, prick out in frames, and transplant early. After being planted they should never be allowed to suffer from the want of water. For very early use, sow a little under glass during February.

COS VARIETIES.

	Per pkt.	Per oz.	s. d.	s. d.
CANNELLS' EXHIBITION GIANT COS—Larger and finer in every way than the best types of Cos Lettuce	3d. and	0 6	1	0

COS VARIETIES.

The six most useful kinds for succession, one packet of each ...	2 9
" three "	1 6

MAIZE or INDIAN CORN.

This should be more generally grown as a vegetable in this country. As its cultivation is not difficult, and it is not necessary for the seed or cobs to become hard before gathering, they should be made use of when in a green state, or just when passing out of the milky state, and only directly they are required for use. Boiled and served with a suitable sauce, they are quite enjoyable. Sow in April in a gentle heat, and when sufficiently hardened and all danger of frost is over, plant out in a warm position about 18 inches to 2 feet apart.

Cannells' Early Dwarf Sugar, Adam's Early, Early Minnesota, each, per pkt., 3d. & 6d. Other Varieties can be supplied.

MERCURY—(Good King Henry)—(*Chenopodium Bonus Henricus*).

A perennial vegetable much grown in Lincolnshire. The shoots when boiled are tender and much like Asparagus, and the leaves are very useful in place of Spinach. Seeds may be sown in March in drills a foot apart, and then thin out to 9 inches in the rows ... per pkt., 6d. & 1s.

MUSTARD—(*Cruciferæ*).

CULTURE.—Sow every fortnight for succession in boxes, in heat when too cold out of doors. On account of making such rapid growth, should be sown about a day or two later than Cress, when they are required to come in together for cutting.

Cannells' Eynsford White—A splendid, carefully-selected and improved form of the old variety, so generally grown for salads. (Cheaper by the peck or bushel) ... per quart, 1s. 6d. ; per pint, 9d. ; per oz. 2d.

Chinese—Leaves and stems much larger than the common variety, black seeded ... 3d.

MUSHROOM SPAWN.

A reduced Price for large quantities.

Having every facility, and to be quite sure that nothing but the best shall come from us, we collect samples from all reliable sources where manufactured, immediately test which is the best, and purchase accordingly and have specially prepared for us; consequently, all our customers succeed, most of them far above their expectations. At this moment we have a splendid fresh stock.

Per brick, 4d. ; per peck, 1s. 4d. ; postage 7d. ; per bushel of 16 cakes, 5s.

A PRACTICAL TREATISE ON THE CULTIVATION OF MUSHROOMS,

By F. J. Barter. Price 1s., Post free, 1s. 2d.

By using Cannells' Perfect Mushroom Spawn they can be had all the year round.

MELON.

CULTURE.—Similar to that of the Cucumber, but requiring several degrees more of heat, which must be maintained with regularity. A quick growth should be encouraged during the earlier stages, and when about 1 foot or so high the tips should be pinched out, causing them to come stronger, and the fruit sets more freely. As a rule they are in perfection just before the stems come away easily from the fruit. The soil should be kept firm and solid throughout the growth; they prefer a rich fibrous loam.

	Per pkt.—s. d.
Blenheim Orange—Scarlet flesh, delicious flavour ...	1 0
Diamond Jubilee—Oblong in shape, beautifully netted, golden yellow when ripe. Flesh greenish white, flavour excellent ...	1 0
Earl's Favourite—Green fleshed, delicious flavour; a strong grower and free setter; does quite as well in cool frames as in the houses	1 0
Golden Beauty—Remarkable for its deep flesh of rich salmon with a bright golden skin beautifully netted ...	1 6
Gunton Scarlet—Medium size, beautifully netted, delicious flavour; valuable addition to the scarlet-fleshed varieties ...	1 0
Hero of Looching—Handsome fruit, skin, rich golden, regularly netted with white. Flesh almost white, exquisite flavour 6d. &	1 0
Invincible—Globular form, orange-red skin evenly netted, thick bright scarlet flesh, grand flavour, sets freely, first class for frame	1 0
Munro's Little Heath—Easily cultivated, very prolific, and one of the hardiest. The flesh is scarlet ... 6d. and	1 0
Read's Scarlet Flesh—One of the most exquisite flavoured Melons in cultivation, beautifully netted ...	1 0
Royal Sovereign—Free setting, beautiful golden yellow, slightly netted, flesh white, tinged green; very deep. Award of Merit, R.H.S.	1 0
Taunton Hero—Round in shape, lightly netted, and bright golden yellow in colour. The flesh is white, deep, melting ...	1 0
Cantaloup—Suitable for growing outdoors in tropical and sub-tropical countries ... 6d. and	1 0

Other Varieties can be supplied.

FOR PLANTS, SEE PAGE 19.

CANNELLS' PRIZE MEDAL ONIONS.

AWARDED MANY GOLD AND SILVER MEDALS.

CULTURE.—The ground should be double dug in October or early in November. The ground can then be left in its rough state until early in January, when a good dressing of soot may be spread over the surface, which is not only a preventive for the maggot, but a valuable stimulant for the Onion throughout the different stages of its growth. Nothing more should be done until the end of February or March, when (weather permitting) the beds should be pointed over, well raked, and rolled or trodden down firm, and the seed drilled in rows 1 foot apart, which leaves ample room for a draw-hoe, which cannot well be used too often, if care be exercised to avoid any injury to the tops. As soon as the Onions are up and well established thin out to 9 inches apart, and during an early stage of their growth a liberal top-dressing of spent mushroom bed manure would be beneficial in keeping the ground moist and cool in hot, dry seasons, and saving a considerable labour in watering. When they are in full growth a dressing of our "Real Manure," 2 ounces to the yard, will do wonders for them, especially if well watered in, should the weather be dry. Soot sown broadcast in showery weather will help to keep down the mildew and also encourage growth. For what are termed Tripoli or Winter Onions, sow early in August and transplant the following spring. Onions may be grown on the same piece of land for years if good tillage is kept up every season. By sowing the Tripoli or autumn Onions early in August, and transplanting the seedlings in due course, followed with a sowing, weather permitting, of *Early Eight Weeks* in February, and then again with the spring varieties, it is possible by this method to have Onions throughout the year.

SPECIALLY SELECTED EXHIBITION VARIETIES.

Seeds saved from the finest Exhibition and most typical Bulbs and True Pedigree Stocks. Per pkt.—s. d.

THE GIANT—Of beautiful globe shape, and larger than either <i>Ailsa Craig</i> or <i>Excelsior</i> ; very heavy and solid, of excellent flavour, and a first-class keeper ; pale yellow in colour	1 6
CANNELLS' AILSA CRAIG—One of the largest and most beautiful kinds ; bulbs vary from almost a globe to a deep flat oval shape, are of a pale straw colour	per oz., 2s. 1 0
Cocoa-nut—Skin is very delicate pale straw colour, flesh white and very mild ; useful for exhibiting in collections	6d. aud 1 0
Improved Wroxton—May be grown to a large size ; delicate light brown straw colour ; egg-shaped and quite distinct	6d. and 1 0
Cranston's Excelsior—Small neck, globe-shaped ; pale straw	6d. and 1 0
Reading Improved—Beautiful shape, mild flavour ; keeps good for a long time ; useful for the exhibition stage	6d. and 1 0
CANNELLS' GLOBE—Very globular, and of a deep rich straw colour ; attains a large size	1 6

Plants of Exhibition Varieties raised under glass in the spring and specially prepared in pots, of all the finest kinds. See page 19.

Potato-Onion—See page 20.		

FOR PLANTS, SEE PAGE 20.

Other varieties can be supplied.

ROUSHAM PARK HERO.

We have the finest collection of Cacti in the World.

PARSLEY.

CULTURE.—Should the weather be dry, sow early in February; if not, defer till middle of March. Sow again in May, and also July, for furnishing plants to stand over winter. Parsley seed is rather longer than most seeds in germinating and should be watered in dry weather if necessary. The secret of having it good all the year is to sow in good soil, 16 inches from plant to plant.

	Per pkt.	Per oz.		Per oz.
	s. d.	s. d.		s. d.
CANNELLS' EYNFSFORD BEAUTY—A beautiful kind. For garnishing and exhibition purposes this will meet all requirements. Well adapted for pot culture; compact habit 3d. and 0 6 1 0

Covent Garden Garnishing—One of the best curled varieties ... 0 6				
Myatt's Garnishing—A splendid variety; very double ... 0 4				

PARSNIP.

CANNELLS' FIRST PRIZE.

CULTURE.—Sow about the second week in February, or first in March, or as early as the ground is in a fit state to receive the seed; choosing a light deep-trenched soil if possible; and if required for exhibition, make a hole 3 feet deep with a crowbar, push this round so that the hole is largest at the top, fill with fine soil, and finish off with dibbling in three seeds. After germinating leave the strongest seedling, assist them when in full growth, make four holes a foot deep in the soil and about 5 inches away from the plant, which can be occasionally filled up with liquid manure. They should be allowed to remain in the ground as long as the weather permits, and when lifted should be carefully placed in sand.

	Per oz.—s. d.
CANNELLS' FIRST PRIZE — A grand variety for exhibition; skin smooth and well blanched; of splendid shape, and tapering off with perfect regularity, per packet, 4d. 0 8	
CANNELLS' STUDENT—A first-class variety for the garden 0 6	
CANNELLS' HOLLOW CROWN — A selected stock producing long, clean, and smooth roots, free from side shoots; very tender 0 4	
Jersey Marrow—Extra large 0 4	

OUR STOCK IS GROWN FROM ANNUALLY SELECTED ROOTS ONLY.

KITCHEN AND EXHIBITION SEED POTATOES.

SPECIALLY GROWN AND SELECTED FOR SEED, AND TRUE TO NAME.

Those marked with a * are good Exhibition varieties.

It is absolutely necessary that full Rail Address should accompany all orders for Potatoes.

CULTURE.—Consider the condition of the soil—if rich, pulverize it by digging two, three, or four times. Plant early, before the strong eyes at the principal end start growing. Do everything possible so that the foliage is in no way injured. Take up early. Never clamp up tight until frosts set in—this prevents premature growth. Peel with a proper peeling knife. Do this every evening, and let them lie in water all night, and you certainly cannot fail to have mealy, beautiful eating Potatoes when cooked.

RHUBARB (Seed).

Seed of this family is preferable for sending abroad. Sow in March on a light rich soil in drills about 2 ft. apart; thin out, allowing the strongest plants to remain 10 to 16 inches apart.

Champagne. Early Red. Royal Albert. Victoria. Finest Mixed.
6d. per packet

Rhubarb Roots, see page 20.

SALADS.

We supply seeds of plants generally used at various times of the year in the preparation of this now recognised necessity on the dining table. Descriptions will be found under the various headings—Barbe de Capucin, Celeriac, Chervil, Chicory, Chives, Corn Salad, Cress, Cucumber, Dandelion, Endive, Lettuce, Mustard, Nasturtium, Purslane, Radish, Rampion, Salsify, Shallot, Tarragon, Tomato, Watercress, Witleaf.

SALSALFY (Vegetable Oyster).

Although Salsify is not usually cultivated in small gardens, there is no reason why it should not be, as the roots form a valuable addition to the somewhat limited list of winter vegetables. They are easily cooked, merely require scraping, steeping in vinegar and water, then boiled until tender, after which they may be served up with white sauce.

Per oz.—s. d.

CANNELLS' MAMMOTH—Best quality 0 10

SPINACH.

CULTURE.—Should the weather be favourable, a small sowing of the round variety may be made in January, another in February, and a larger one in March. Successive sowings may then be made every three weeks till the beginning of May, and afterwards weekly to the end of July. For winter use, sow the prickly variety weekly during the first three weeks in August. The *New Zealand* should be sown in heat and transplanted, and be protected till the beginning of June, when it may be planted out without shelter.

CANNELLS' EYNFSORD FAVOURITE.—A great advance on the old round form of Spinach, well adapted for winter and summer sowing per pint, 1s. 6d. 0 4
Prickly or Winter—For winter use per qt., 1s. 9d.; per pt., 1s. 0 2
Round or Summer—For summer use 1s. 0 2
New Zealand—Should be sown in February in heat and transplanted in June 0 6
Orach or Mountain—Quite distinct 0 6
Perpetual Spinach, or Green Beet—Furnishing leaves in great abundance, should be regularly picked so as to encourage good growth; leaves are quite green 0 6

CANNELLS' EARLY SIX WEEKS.

SCORZONERA.**CANNELLS' SELECTED.**

The roots are boiled or stewed in the same way as Parsnip. A delicious vegetable.

9d. per oz.

SEA KALE**(Seed).**

CULTURE.—Sow in March or April in rows, about 15 inches apart, and keep the plants clear of weeds. Transplant to good, well-trenched, and rich ground, in clumps of about four or five, and between each lot so planted leave a space of about 3 feet, so that any one can move between them during the growing season.

9d. per oz.

For Plants, see page 20.

SHALLOTS

See page 20.

SEA KALE.

STRAWBERRY (Seed).

CULTURE.—Seed may be sown in slight heat during the end of January and February, or if strong plants are required early in the next year, seed may be sown in September in a cold frame. When large enough, plant out in beds in the usual way as required.

Alpine Red . . . per pkt., 6d. **Alpine White** . . . per pkt., 6d.
Choice Large Fruited Varieties, Mixed, saved from the best kinds only. Per pkt., 6d. and 1s.

For Strawberry Plants, see Bulb List.

TURNIP (Garden).

CULTURE.—Sow in March, April, and once a month till the end of August. Sow *Six Weeks* and *Snowball* till May; they are the best for early use.

SEED SAVED FROM ONLY THE FINEST SHAPED AND MOST SOLID BULBS.

		Per pint	Per oz.
CANNELLS' EARLY SIX WEEKS —Beautiful shape, the quickest variety grown, and one of the best for general crop	1 9	0 4
Early Snowball —Good for exhibition	1 9	0 4
Early White Stone —Suitable for summer use	1 6	0 3
CANNELLS' GARDEN SWEDE		1 6	0 3
Golden Ball —The best type of yellow garden Turnip. Flavour is excellent, and stands the winter well	2 0	0 4
Green Top Stone —For late sowing	1 6	0 3
Model White —Remarkable for its form, earliness, and quality. Strongly recommended to exhibitors	1 9	0 4
CANNELLS' SCARLET SIX WEEKS —Award of Merit, R.H.S. Distinct, a splendid rich-coloured red skin; full size	—	0 6
Red Garden Globe —Fine shape and quality, equally suitable for early use, main crop, or autumn sowing	2 0	0 6
All the Year Round —A green-top yellow variety; stands the severest weather	1 6	0 3	
American Red Stone —A most excellent kind	1 9	0 4
Chirk Castle Black Stone —A capital variety for August sowing; the skin is black and the flesh snowy white	2 6	0 6
Early Purple-top Munich —The earliest of all, fine flavour; suitable for exhibition	2 6	0 6	
Orange Jelly —One of the best	1 6	0 3

We are noted for our Cannas.

TOMATO, or LOVE APPLE.

CULTURE—Sow in February or March in heat, pot, and gradually harden off, so that they may be ready to plant out the latter part of May to a sheltered location. For indoor purposes, get good plants in 4 or 5-inch pots; when they show a truss of flower they require fertilising or setting with a camel-hair brush. As soon as the fruit is formed, plant them out in ordinary good soil, 12 inches from plant to plant, pinch out all side shoots, and preserve the large leaves; if fruit fails to form, apply pollen at once, so that the plants bear fruit from bottom to top. Pick fruit as soon as ripe, and never select any other than fruit full of seed; ill-formed ones are disappointing, and often get seedsmen and gardeners in bad repute on this account.

CANNELLS' KING.

Queen Alexandra	—Large fruit, perfectly smooth and symmetrical, splendid colour	6d. and	1 0
Sunrise	—Rich scarlet; one of the earliest. First Class Certificate, R.H.S.	6d. and	1 0
Swanley Superlative	—Of globular form, rich colour, and a heavy cropper. Continues fruiting for a long period	6d. and	1 0

		Per pkt.—s. d.
Balch's Fillbasket	—Medium sized well-formed fruits 1 0
CANNELLS' KING	—Brilliant red; full, very free setting, and is certainly by far the best variety for flavour 6d. and 1 0
CANNELLS' OPEN AIR	—A superior and first-rate variety for outdoors	... 3d., 6d. and 1 0
Duke of York	—Rich scarlet, round in shape, flesh very firm, fine flavour, splendid cropper	... 6d. and 1 0
Frogmore Selected	—Deep bright red, smooth and almost round, firm and solid. Suitable for outdoor cultivation	... 6d. and 1 0
Golden Jubilee	—Handsome. Clear golden-yellow. Flavour delicious. Raised at the Royal Gardens, Windsor	... 6d. and 1 0
Ham Green Favourite	—Good size, scarlet, and of fine shape; a wonderful cropper	... 6d. and 1 0
Holmes' Supreme	—Short jointed, stiff and sturdy growth; fruit medium size, smooth and round, firm flesh	... 6d. and 1 0
Lawrenson's No. 3	—Remarkable for its free setting and dwarf habit, medium size, deep crimson, heavy cropper	... 6d. and 1 0
Money Maker	—An enormous cropper, perfectly globular fruits of a scarlet colour; solid flesh; fine flavour 1 0
Prince Borghese	—Large scarlet egg-plum like fruits ending in a peculiar point, joined to big clusters, each reaching often the weight of several pounds 1 0
Tuckswood Favourite	—Dwarf compact habit, fruit round, smooth, handsome, brilliant red colour, medium size	... 6d. and 1 0
Winter Beauty	—Useful for winter work; producing highly coloured fruit of medium size and fine flavour	... 6d. and 1 0

Other varieties can be supplied.

VEGETABLE MARROW.

CULTURE.—The seed may be sown in a slight heat at the end of March, and shifted from the pots about the middle of May, when select an open piece of ground and throw out holes from 2 to 3 feet square and 1 foot deep, which should be at least 12 feet apart, the soil thrown out being used to raise the sides. A layer of dry leaves or litter should be spread over the bottom, and afterwards a sufficient quantity of ordinary good soil, wherein a small portion of leaf-soil and spent manure has been mixed, to refill it. The plants being hardened off, should receive at the time of planting a good watering, and be shaded and protected as long as necessary. Planted off in this manner they make firmer and shorter jointed growth, are more prolific, less water required, and not so liable to go off when in full bearing, as often happens under a more forcing treatment. They can also be grown with success outdoors by putting in a few seeds the first week in May, where they are to remain,

		Per pkt.—s. d.
CANNELLS' CREAM	—Splendid for exhibition	3d. and 0 6
CANNELLS' EARLY PROLIFIC	—A heavy cropping kind, setting its fruit quicker than some varieties	3d. and 0 6

ONIONS, PLANTS.

Small Plants out of Boxes, and Plants in 2½-in. pots, well-hardened off and ready for planting out first or second week in April.

Owing to the increasing demand for our Onion Plants, we have made special preparations for growing the undermentioned exhibition kinds in small and large plants, the former in boxes and the latter in pots; these we strongly recommend to our customers as having received no check in their growth, ultimately make the best plants and the finest exhibition bulbs.

We should esteem it a favour, when it is possible, for customers to order all potted Plants before the 1st of April, otherwise we cannot guarantee to supply.

CANNELLS' LAWN GRASS SEEDS.

Fresh, Well Cleaned, and Perfect.

For PARKS, TENNIS LAWNS, TERRACES, CRICKET GROUNDS, PLEASURE GROUNDS, BOWLING GREENS, GOLF LINKS, TOWN LAWNS, UNDER TREES, &c.

THERE is nothing more essential to a rural or a suburban residence than a beautiful lawn with its close velvety turf. In sowing down a lawn be sure the soil is perfectly clean, and if poor a good dressing of loam should be well spread over about three or four inches deep. After being well rolled and raked very fine the seed may be sown broadcast and as evenly as possible, then rolled down. In a few weeks the grass will appear and be ready for cutting, which operation should be often performed, using the scythe until the lawn be well established, when it may be cut with machine and rolled as frequently as required. It should be sown in April, May, August and September, always taking advantage of the most suitable weather.

Finest Mixed Lawn Grass, a choice mixture of dwarf evergreen grasses, suitable for Tennis Courts, s. d. s. d. s. d. per bushel.
Garden Lawns, Bowling Greens, &c. 1 6 7 0 25 0

Fine White Lawn Clover 1 6 — — —

Fine Mixed Lawn Grass, suitable for general purposes, Lawns, Cricket Grounds, Renovating, &c. 1 0 5 6 20 0

Perennial Rye Grass, cheap grass seed for odd purposes 0 8 2 6 9 0

1 pound will sow 300 square feet; 1 peck will sow 2,400 square feet; 1 bushel, 10,000 square feet; 4 bushels, 1 acre.

Climax Lawn Sand (non-poisonous), for destroying Moss and Daisies, and other rough-leaved weeds having surface roots, at the same time promoting the growth of the finer grasses. It quickly transforms a weedy, neglected lawn into a perfect sward. Sample tins 1/3, 7 lbs. 2/-, 14 lbs. 3/6, 28 lbs. 6/-, 56 lbs. 11/-, 1 cwt. 20/-, 28 lbs. will dress 100 square yards.

Lawn Sand and Weed Destroyer.—An excellent preparation in the form of a white powder for destroying Daisies, Buttercups, Dandelion, and other weeds in lawns; it also encourages the growth of grass. Per tin, 1/-

Special Quotations made for large quantities of the above.

PERMANENT PASTURE GRASSES, 30s. to 35s. per acre.

According to the varieties used in mixture.

RENOVATING MIXTURE FOR PASTURES, per lb., 1/-; per cwt., 85s.

We recommend sowing 2 to 3 bushels of Mixed Grasses and 10 to 12 lbs. of Mixed Clovers per acre for Permanent Pastures; and to Renovate 1 bushel Mixed Grasses and 4 lbs. Mixed Clovers or more, according to conditions of existing crop.

Suitable Mixtures for any particular situation or soil can always be supplied, if the general nature of the soil and the situation of the field is described when making inquiries.

Wreaths, Bouquets, Crosses, &c., made to order.

gc	Greenhouse Climber.	ha	Hardy Annual.	lhc	Half-hardy Climber.	sp	Stove Plant.

HARDY ANNUALS may be sown from February till the end of September; March, April and May are the best months for general summer display; June and July for autumn blooming; August and September for spring flowering. **HALF-HARDY ANNUALS**—Sow from the beginning of March to the end of May; place in a frame on a gentle bottom heat. When sowing from the middle of April to the end of May they may be easily raised without artificial heat, and by selecting a warm, sheltered situation, and covering them with a hand-light till they are strong enough to bear transplanting.

BIENNIALS AND PERENNIALS—The most select and tender varieties for summer and autumn blooming may be sown in a gentle heat in March and April, and potted into pots until fully established, and then potted off singly, or transplanted into the open ground, as required. The harder varieties may be sown in the open ground, in prepared beds in June and July, and when strong enough transplanted to where they are intended to bloom the following year.

HERBACEOUS PLANTS are those Perennials which lose their stems annually, whilst the roots continuo alive in the ground.

		Per pkt.—s. d.		Per pkt.—s. d.
107	Abronia Umbellata (Sand Verbena)—Dolicate rose; dwarf trailer, for poor dry soils and rockwork, hha, $\frac{1}{2}$ ft.	0 3	138	Amaryllis (Hippeastrum), newest Hybrids —Saved from a collection of exceptionally fine varieties . . . 1s. 6d. and 2

ASTER COMET, IMPROVED GIANT WHITE.

We excel in Tuberous Begonias.

OUR ASTERS

are known and celebrated
as the best.

AWARDED SEVERAL SILVER
AND SILVER-GILT
FLORAL MEDALS BY
THE ROYAL
HORTICULTURAL SOCIETY.

CULTURAL DIRECTIONS.—Sow Aster Seed in February and March in pots, or on a spent hot-bed in drills, 4 inches apart. Soon after the plants are up prick out into a cold frame, or under hand-glasses, 3 to 4 inches apart, from whence they can be planted out when 4 inches high. Select showery weather for planting, when the ground is in good working order; plant out in rows 1 foot apart each way. To grow Asters to perfection a rich deep soil is indispensable, and during dry weather they should be watered, and a top dressing of well-rotten manure applied early in August. Be very particular that they are always thoroughly free from insects when they are planted out, otherwise the leaves will become curled, and vigour and protection lost for the season. If required for exhibition the buds should be thinned, and the plants well watered with liquid manure. During the last fortnight cover with glass.

		Per pkt.	s.	d.

CANNELLS' TUBEROUS BEGONIAS.**THE GOLD CLOCK COLLECTION.**

Tubers in the dormant state supplied from the end of October until March. After that date in plants.

Scatter the seed on a level, moderately-firm surface, cover with glass and paper, keep it in darkness until germinated; sow and place in heat at any time of the year, or as soon as the seed is ripe; pot the young seedlings off as soon large enough, and re-pot when necessary; in three or four months they begin to display their beautiful blooms.

CANNELLS' GRANDIFLORA, SINGLE—

326.	Single, Fringed or Frilled—The quality of seed offered having been gained by artificial hybridising will undoubtedly produce the highest percentage of frilled flowers. Colours mixed	1s. 6d.	2	6

Our Peonies are a gorgeous sight during flowering season.

BEGONIA GRACILIS, PRIMA DONNA.

BEGONIAS, SEMPERFLORENS AND WINTER-FLOWERING.

Per pkt.—s. d.

327	Davisi — Bluish-green foliage, flowers scarlet, hhp, $\frac{3}{4}$ ft.	1	6
328	Erfordia — Lovely rosy-carmine, height about 12 to 15 inches. It is a splendid bedder, and also a good Winter-bloom variety, hhp, 1 ft. 6d. and	1	0
329	— Red — A fine improvement; erect growth; deep purple-coloured leaves when fully exposed to the sun, hhp	1	0

Per pkt.—s. d.

330	Begonia Gracilis, Prima Donna — Flowers unusually large, of a clear rose, shading to carmine towards the centre	1	0	
331	Gracilis, Fireball — The brightest coloured; brilliant crimson	1	0	
332	Semperflorens Autropurpurea (Vernon) — Orange-carmine flowers, and glossy deep brownish-red foliage	... 6d. and	1	0
333	— Compacta — Forming small, round, very compact bushes of about 4 to 5 inches in height, brilliant red flowers and deep brownish red foliage 6d. and	1	0
334	— Alba — Very fine white 6d. and	1	0
335	— Rosea — Rose-coloured flowers in great profusion,	6d. and	1	0
336	— Mixed — Hhp, 1 ft. 6d. and	1	0

337	Rex — Ornamental-leaved varieties, mixed, hhp, 1 ft.	1s. 6d. and	2	6
338	— Rubens — Red and pink centred foliage	1	6

339	Bellis Perennis Monstrosa Fl. Pl. (Giant Daisy) — Beautiful and densely imbricated flowers of an unusual size, and varying in different tints, hp 6d. and	1	0
340	Bellis Perennis Ranunculiflora Alba — A double pure white variety	1	0
341	— "The Bridegroom," Fl. Pl. — Very large; deep rose, long stalks 6d. and	1	0
342	Brachycombe Iberidifolia (Swan River Daisy) — Blue Cineraria-like flowers; very profuse flowering, hha, 1 ft.	0	3
343	Browallia Elata Grandiflora — A pretty plant for the greenhouse or conservatory; bright blue, hha, 1 $\frac{1}{2}$ ft.	0	3
344	— Alba — Pure white flowers, hha, 1 $\frac{1}{2}$ ft.	0	3
345	— Speciosa Major — Blue; a valuable pot plant; splendid winter-blooming species, hha, 1 $\frac{1}{2}$ ft. 1	0	0

BEGONIA, SINGLE FRINGED OR FRILLED.

Per pkt.—s. d.

346	Caecilia Coccinea (Tassol Flower) — Flowers scarlet, ha, 1 ft.	0	3	
347	— Aurea (Lutea) — Yellow, ha, 1 $\frac{1}{2}$ ft.	0	3
348	Caetus — Such as <i>Cereus</i> , <i>Echinocactus</i> , <i>Echinocereus</i> , <i>Echinopsis</i> , <i>Mammillaria</i> and <i>Opuntia</i> in mixture, gp,	1s. and	1	6
	Calampelis — See <i>Echinocarpus</i> .			
349	Calandrinia Grandiflora — Rose-coloured flowers, ha, 1 ft.	0	3	
350	— Speciosa — Purple, ha, $\frac{1}{2}$ ft.	0	3
351	— Alba — White, ha, $\frac{1}{2}$ ft.	0	3

CALCEOLARIA SUNBEAM.

We cordially and respectfully invite all to "Come and See."

CALCEOLARIAS.

AWARDED THE GREAT SILVER CUP.

Sow in August, and from the moment they are up do everything to keep them growing. Rain water is absolutely necessary. Let them be carefully shifted from the small pot to the 5-inch. Let the night temperature and moisture be such as to cause a nice refreshing dew to stand on the surface of the leaves every morning. This wards off insects and gives vigour to the plant, but it should be dispelled during the day by the admission of air. Keep all greenery away, if coddled in a house, they are almost sure to be attacked. If so, the most effectual means must be adopted by placing them in a lofty position and fumigating. As soon as the first root appears at the drainage hole, let them be shifted intact and without injury into their blooming pots, making sure that every pot is well drained, for no plant is more liable to become sickly and yellow in wet sour soil than the Calceolaria. As soon as the pots become well filled with roots, give liquid manure once a week, and stake out and fumigate thoroughly just before they show flowers, and the result will be a grand sight. Apply soot and bone meal to give darker foliage.

Per pkt. -s. d.

352	Swanley Hybrid Dwarf Perfection	—A splendid strain flowers very large and of fine form, including all the very best spotted and self-coloured varieties, gp	1s. 6d. and	2	6
353	Hybrida Grandiflora, Olympia	—Large flowers of a deep brown-red colour on bright yellow ground, gp, 1½ ft.		1	6
354	Sunbeam	—Fine form and substance; yellow ground with a large reddish-brown spot; ray-like, lined with yellow		1	6

457	— <i>Japanese Early-Flowering Dwarf Varieties</i> —The seed should be sown in February, and as soon as large enough to be handled pricked out into boxes or pots, they will then flower the first year, hhp... 1 0	
458	— <i>Mrs. C. Lowthian Bell</i> —Flowers very large, pure white, hp, 1½ ft. 1 0	

Our house of Gloxinias once seen never forgotten.

CANNELLS' CINERARIAS.

If required to flower in winter, seed must be sown in May or June. The secret of growing well is to grow fast, never allowing them to receive a check, either from being pot bound, dryness of root, or attack of insects, the cooler they are kept the better, just preventing frost reaching them, and giving abundance of air. If the green aphis is not kept thoroughly away there will not be a bloom worth seeing. Of course at all times the keenest observation of extreme temperature must be made for cold, cutting draughts or a too glaring sun.

Per pkt.—s. d.

461	Cinerarias. Cannells' Star (Stellata)—The 20th Century Strain. An acquisition for conservatory decoration. Many have a most agreeable scent, and when cut they last long in water	1s. and	1 6
462	— Stellata, Gem of the Stars—A beautiful soft salmon-pink shade, the petals of which are somewhat twisted, 1s. 6d. and	2 6	
463	— grandiflora (Single) Cannells' First Prize—Unparalleled for size and substance, gp, 1½ to 2 ft., 1s. 6d., 2s. 6d. and	3 6	
	CINERARIA HYBRIDA GIGANTEA—Flowers measure 2½ to 4 inches across, and in regard to form and size are of the greatest perfection.		
464	Dark Red shades with white	each, per pkt.	2 6

CYCLAMEN, WHITE SWAN.

CYCLAMEN, CANNELLS' PERSICUM.

OURS ARE THE FINEST AND NEAREST
PERFECTION EVER SEEN.

Awarded a Silver Medal by the Royal Horticultural Society
for our Strain.

Awarded a Silver Gilt Medal for a Collection of Plants and a
Certificate of Merit for the Strain, Royal Horticultural Society.

Sow seeds thinly, in a compost of two parts turfy yellow loam, one of peat and leaf-mould mixed together, and one part of thoroughly decayed cow-dung sifted very fine, and a little silver sand; cover the seeds to the depth of a quarter of an inch; place the pots on a shelf in the greenhouse, near the glass in the winter, and in summer in any shaded pit. Under no circumstances must the surface of the soil become dry. Some of the seeds take four months to germinate.

Per pkt.—s. d.

505	Papilio, White Swan	The large bright white orchid-like fringed flowers are very attractive, and worthy to rank among the very best	1s. 6d. and	2	6

KOCHEA SCOPARIA (MOCK CYPRESS OR BELVEDERE).

We have a fine strain of *Gerbera Jamesoni Hybrida*.

		Per pkt.—s. d.
677	<i>Impatiens Sultani</i> (Balsam)—Of neat, compact growth, brilliant rosy-scarlet colour, gp, 2 ft. 1 0
678	<i>Iberis Sempervirens</i> —The evergreen Candytuft. Pure white; for edgings, beds, and rockwork, hp, 1 ft. 0 4
	<i>Iberis</i> —See Candytuft.	
679	<i>Incarvillea Delavayi</i> —Gloxinia-like flowers of rose to carmine, hp, 2 ft. 1 0
680	<i>Ice Plant (Mesembryanthemum Crystallinum)</i> —A singular trailing plant, thick fleshy leaves covered with crystals of ice. Sow in heat in March, hha, $\frac{1}{2}$ ft. 0 3
	<i>Indian Cress</i> —See Nasturtium.	
	— <i>Pink</i> —See Dianthus Chinensis.	
	— <i>Shot</i> —See Canna.	
681	<i>Inuia Ensifolia</i> —Free flowering and showy, pure golden yellow; does well in any soil, hp, 1 $\frac{1}{2}$ ft. 0 6
682	<i>Ionopsidium Ataule</i> —Lilac flowers, very pretty and useful for rockwork; pots, hha, $\frac{1}{2}$ ft. 0 3
683	<i>Isatis Glauea</i> —Small flowers of a light but very bright yellow; most effective and imposing object, hp 0 6
684	<i>Kalanchoe Flammula</i> —A succulent plant; fleshy leaves and flowers in loose cymes, borne well above the foliage on slender stalks of a brilliant orange-red, 1 $\frac{1}{2}$ ft. 1 6
685	<i>Kochia Scoparia (Trichophila)</i> —One of the most beautiful and distinct plants ever seen in the garden, hha.	
	We are anxious to impress upon intending purchasers of this remarkable plant the superiority of our strain as being the finest procurable. It has come to our knowledge that an inferior variety is being distributed, causing this highly decorative Autumnal plant to be depreciated 6d. and 1 0
686	<i>Lantana</i> —A beautiful plant, either for garden or greenhouse. Saved from our collection Mixed. Sow in March, hhp	0 6
687	<i>Larkspur Bismarck</i> —Very fine. Mixed, ha, 1 ft. 0 3
688	— <i>Grandiflorum Butterfly</i> —Clear blue with brown spots; single flowers; dwarf; pretty, hp, 1 ft. 0 6
689	— <i>Hyacinth-Flowered</i> —Dwarf and beautiful class, with double flowers. Mixed, ha, 1 ft. 0 3
690	— <i>Tall Double Rocket</i> —Finest. Mixed, ha, 1 $\frac{1}{2}$ ft.	0 3
691	— <i>Stock - Flowered Rosy Scarlet</i> —Habit tall and branching, specially suited for cutting, ha 0 6
	<i>Lathyrus Odoratus</i> —See Sweet Pea.	
692	— <i>Latifolius (Everlasting Pea)</i> —Red, hp, 6 ft. 0 3
693	— — <i>Albus</i> —White, hp, 5 ft. 0 6
694	— — <i>Pink Beauty</i> —Delicately shaded pink on the standard; wings are deeper pink, hp 6d. and 1 0
695	— — <i>White Pearl</i> —An excellent variety with long spikes of very large flowers 1 0
696	<i>Lavendula Spicata (Lavender)</i> —hsh 3d. and 0 6
697	<i>Lavatera Arborea Variegata</i> —Very ornamental, hp, 4 to 5 ft. 0 6
698	— <i>Trimestris, Red</i> —Pinkish red; very effective in shrubbery borders, ha, 3 to 4 ft. 0 3
699	— — <i>White</i> —A white form, ha, 3 to 4 ft. 0 3
700	<i>Layia Elegans</i> —Pretty and attractive. A bed of this produces a fine effect, ha, 1 $\frac{1}{2}$ ft. 0 3
701	<i>Leptosiphon Hybridus</i> —Bright and beautiful colours, mixed, ha, $\frac{1}{2}$ ft. 0 3
702	<i>Leptosyne Stillmanni</i> —Golden-yellow. Best sown in the open air in a sunny situation, ha, 1 ft. 0 6
703	<i>Limnanthes Dougglasii</i> —Yellow and white; pretty; good for edging, clumps, &c., ha, $\frac{3}{4}$ ft. 0 3
704	<i>Linaria Reticulata Aurea Purpurea (Toad Flax)</i> —One of the most showy annuals, ha, 1 ft. 3d. and 0 6
705	<i>Linum Flavum</i> —Golden yellow; pretty, hp, 1 ft. 0 4
706	— <i>Grandiflorum Rubrum (Scarlet Flax)</i> —Splendid colour, ha, 1 $\frac{1}{2}$ ft. 0 3
707	— <i>Perenne</i> —Blue; neat border species, hp, 1 $\frac{1}{2}$ ft. 0 3

LOBELIAS.

			Per pkt.—s. d.
708	Cannells' Trailing —A splendid bright blue variety with white eye, very spreading and free-flowering; useful for hanging baskets 6d. and	1 0
709	Cambridge Blue —As name denotes, a pretty blue	1 0
710	Emperor William —Deep blue	0 6
711	Barnard's Perpetual —Ultramarine-blue, pure white at the base of the two lower petals, hha, $\frac{3}{4}$ ft.	0 6

LOBELIA, CANNELLS' TRAILING.

712	Brighton —For general purposes, the brightest blue Lobelia, hha, 4 in.	0	6
713	Crystal Palace Compacta —Deep blue; excellent for edgings and carpet bedding, hha, 4 in.	0	6

734 —— <i>Haageana Hybrida</i> —Large flowers, bright colours, hp 1 ft.	0 6
Maize—See <i>Zea</i> .	
735 <i>Malope Grandiflora Alba</i> —Very free flowering; useful for mixed borders, ha, 2 ft.	0 3
736 —— <i>Purpurea</i> —Handsome flowers of a shiny crimson-purple, useful for cutting, ha, 2 ft.	0 3
737 —— <i>Rosea</i> —Very pretty pale pink...	0 3
738 <i>Malva Moschata Alba Major</i> —An extremely pretty and attractive plant, hp, 2 to 2½ ft.	0 3
739 <i>Marigold, Selected Africæn</i> —Mixed, hha	0 3
740 —— <i>Africæn Orange</i> (<i>Tagetes erecta</i>)—Heads of bloom of immense size, hha	0 3
741 —— <i>Light Lemon</i> —Extra fine for exhibition. Equally as fine in quality as the preceding, hha	0 3
742 —— <i>Dwarf French</i> —Selected from the choicest blooms and dwarfest plants; hha, 1 ft.	0 3
743 —— <i>Legion of Honour</i> —The single flowers are golden yellow, with a broad velvety blotch on each petal, hha, 1 ft.	0 4
744 —— <i>French, First Prize Strain</i> (<i>Tagetes Patula</i>)—Very showy, striped gold and crimson, 1½ ft.	0 6
745 <i>Martynia Fragrans</i> —Fragrant crimson-purple flowers, hha, 2 ft.	0 3
746 <i>Marvel of Peru</i> (<i>Mirabilis Jalapa</i>)—Dark green glossy foliage; the best colours, mixed, hhp, 2 ft.	0 3

	Per pkt.—s. d.
747 <i>Mathiola Bicornis</i> (Night-scented Stock)—Light lilac; fragrant in evening and morning, hha, 1 ft.	0 3
748 <i>Matricaria Eximia</i> "Golden Ball"—Golden yellow; compact pyramidal growth, hp, 1 ft.	0 6
749 —— <i>Nana Aurea Crispa Compacta</i> Fl. Pl.—Little cream-coloured quilled flowers. One of the curled-leaved Feverfew, hp, 8 in.	0 3
750 <i>Maurandya Barclayana</i> —A slender climber, purple and white tube-shaped flowers; for trailing up pillars, wire, &c., hhp	0 6
751 —— <i>Alba</i> —White, hhp	0 6
752 <i>Meeconopsis Cambalaria</i> (Welsh Poppy)—Thrives well on rockwork; golden yellow, hp, 1 ft.	0 6
<i>Medeola</i> —See <i>Myrsiphyllum</i> .	
753 <i>Melianthus Major</i> (The Honey Flower)—For sub-tropical gardening; green elegant foliage, hhp, 3 to 4 ft.	6d. and 1 0
754 <i>Mesembryanthemum Cordifolium Variegatum</i> —A gem for flower beds and baskets, hha, ½ ft.	6d. and 1 0
755 —— <i>Tricolor</i> —Dwarf, for borders or rockwork, hha	0 3
756 <i>Mignonette, Sweet-scented</i> —ha, 6d. per oz.; per lb., 5s.	0 3
757 —— <i>Cannells' Perfection</i> —One of the finest; a splendid kind for market and exhibition, ha, 1 ft.	6d. and 1 0
758 —— <i>Crimson</i> —ha, 1 ft.	1s. per oz. 0 3
759 —— <i>Bismarck</i> —Growth broad and sturdy; a reddish hue and very sweet-scented, ha, 1 ft.	6d. and 1 0
760 —— <i>Garaway's White</i> —Much grown for greenhouse decoration, ha, 1 ft.	0 6
761 —— <i>Golden Machet</i> —Of compact habit; long massive spikes; distinct, ha	6d. and 1 0
762 —— <i>Gollath</i> —Giant trusses of flowers; a magnificent pure bright red, ha	6d. and 1 0
763 —— <i>Machet</i> —A fine variety; habit dwarf; large and broad spikes of a bright red, ha, ½ ft.	6d. and 1 0
764 —— <i>Miles' Hybrld. Spiral</i> —Habit dwarf and branching, spikes often a length of from 8 to 10 in., ha, 1 ft.	0 6
765 —— <i>Cannells' Red Kling</i> —Colour, red; distinct; neat habit, medium flowers, ha	0 6
766 <i>Mimosa Pudica</i> (Sensitive Plant)—A curiosity; the leaves close up immediately from the slightest touch, ga, 1 ft.	0 6
767 <i>Mimulus Moschatus</i> (Musk)—A well-known trailer, hp	0 3

MIGNONETTE, CANNELLS' PERFECTION.

Our Antirrhinums are a Special feature during Summer months.

MYOSOTIS, RUTH FISCHER.

	Per pkt.—s. d.
768 Mimulus Hybrid, Cannells' Hose-in-Hose — Compact growth. The flowers appear in great abundance. A fine plant for pots, hp	6d. and 1 0
769 — — — Cannells' Perfection (Monkey Flower) — Single; colours and markings novel, hp, $\frac{3}{4}$ ft.	6d. and 1 0
770 Mina Lobata, syn. Ipomoea Versicolor — A rapid climber. Racemes of flowers of bright red to yellowish white, hhc, 12 ft.	1 0
771 Myosotis Alpestris "Distinction" (Forget-me-not) — If sown in August, potted singly, and put in a greenhouse, will flower during the winter, hp	6d. and 1 0
772 — — — Gracilis, White — The plants appear covered with flowers, showing scarcely any leaves, hp	6d. and 1 0
773 — — — Star of Love — Low compact growth, of a lovely pure sky-blue colour, hp	6d. and 1 0
774 — — — Ruth Fischer — A splendid blue; large	1 0
775 — — — "Victoria" — Compact; flowers of a bright azure, blue with a yellow centre, hp, $\frac{1}{2}$ ft.	6d. and 1 0
776 — — — Striata Grandiflora, Royal Blue — Flowers are large and of a dark blue, hp, $\frac{3}{4}$ ft.	6d. and 1 0
777 — — — Dissitiflora (Forget-me-not) — Exquisite blue; beautiful spring bedding plant, hp, 1 ft.	6d. and 1 0
778 — — — "Perfection" — Beautiful sky-blue flowers; the finest and best for cut blooms, hp	1 0
779 — — — Pyramidalis, Blue Gem ...	
780 — — — Pink Gem ...	
781 — — — White Gem ...	
Three charming varieties of erect growth, well adapted for bedding or pot culture.	
782 — — — Pagoda — Beautiful blooms in great profusion during the spring, hp, $\frac{3}{4}$ ft.	0 3
783 Myrsiphyllum Asparagoides (Smilax) — Sprays several feet long of bright green foliage; used for decorative purposes, ge, 6 to 10 ft.	6d. and 1 0
Musk — See <i>Mimulus Moschatus</i> .	
Nasturtiums — See <i>Tropaeolum</i> .	
784 NEMESIA STRUMOSA NANA COMPACTA GRANDIFLORA (Cannell) — This further improvement will, we feel sure, be much appreciated in this decorative and useful annual, hha. Mixed	6d. and 1 0
785 — — — Nana Compacta Grandiflora (Orange Prince) — Dwarf habit, large flowers	1 0
786 — — — Strumosa Suttoni — In colours that run from scarlet to orange, different shades of rose and pink, carmine, crimson, purple, and blood-red, hha, 1 $\frac{1}{2}$ ft.	6d. and 1 0
787 Nemophila Discoldalls — Velvety black, edged white, ha, $\frac{1}{2}$ ft.	0 3
788 — — — Insignis Grandiflora — Lovely blue, white centre, ha, $\frac{1}{2}$ ft.	0 3
789 — — — Mixed , ha	0 3

Our Myosotis Pyramidalis varieties were much admired at the Temple Show.

	Per pkt.—s. d.
790 Nertera Depressa (Bead Plant) — Crimson bead-like berries close to the ground, forms a dainty cushion for a carpet bed in summer, hhp, 2 in.	6d. and 1 0
791 Nicotiana Colossea — Of branching habit and robust growth, adapted for sub-tropical gardening, hha	6d. and 1 0
792 — — — Victoria Affinis (Tobacco) — Gigantic white Bouvardia-like flowers; in the evening and early morning perfume the whole surrounding atmosphere. Very free, hha, 2 $\frac{1}{2}$ ft.	0 6
793 — — — Sanderæ — Carmine-red blossoms produced in hundreds on a single plant, ha	0 6
794 — — — Hybrids — These have been produced by patient effort in selection and hybridising; mixed	0 6
795 — — — Sylvestris — A superb decorative plant. Very long pendent flowers of pure white, hha, 4 to 6 ft.	6d. and 1 0
796 Nierembergia Gracilis — Charming plants for edgings, hanging baskets, or rockwork, hhp, $\frac{3}{4}$ ft.	0 6
797 Nigella Damascena (Devil-iu-a-Bush) — Bluc, ha, 1 $\frac{1}{2}$ ft.	0 3
798 — — — Diversifolia — Flowers bell-shaped, blue and bluish white, 1 $\frac{1}{2}$ ft.	0 6
799 — — — Hispanica (Love-in-a-Mist) — Brown and white, ha, 1 $\frac{1}{2}$ ft.	0 3
800 — — — Miss Jekyll — Vigorous growth and producing long-stemmed flowers of a pretty cornflower blue shade, 1 $\frac{1}{2}$ ft.	0 6
801 Enothera Macrocarpa, syn. Missouriensis Latifolia (Evening Primrose) — Rich yellow, hp, 1 ft.	0 4
802 Onopordon Acanthium (Cotton Thistle) — Bold habit; flowers purplish, hhp, 5 ft.	0 3
803 Oxalis Tropaeoloides — Deep yellow flowers and dark bronze foliage, hhp	0 6
804 Oxalis (Primula Elatior) — Many colours, hp, 1 ft.	0 3
805 Paeony, Chinese — Mixed; saved from a splendid collection, hp	6d. and 1 0

PANSIES (*Viola tricolor*) HEARTSEASE.

806 Masterpiece (New Giant-curved Pansy) — The border of every petal is conspicuously undulated and curled; the size extremely large, hp	1 0
807 Parlisan Giant Improved — Very handsome and beautifully marked flowers of enormous size; of great excellence, hp	1 0

NIGELLA HISPANICA.

		Per pkt.—s. d.
808	Glant, Candidissima (White) ...	6d. and 1 0

846	Somniferum Fimbriatum Fl. Pl.—These produce a great variety of colour, ha, $2\frac{1}{2}$ ft. ... 0 3	
847	The Bride or Giant White—Splendid large pure white single flowers, ha, 3 ft. ... 0 3	
	Welsh—See Meconopsis.	

For Strawberries see Bulb List.

		Per pkt.—s. d.
848	Shirley (<i>Rheas</i> <i>vars.</i>)—The Shirley strain gives us the loveliest of colours. To have the plants at their best, seed should be sown quite early in September. Our strain can be truthfully termed "extra good," ha, 1½ ft. 3d. and 0 6	
849	Dwarf Shirley, Salmon Shades —These charming and novel tints are especially effective, ha 0 6	
850	A COLLECTION OF CARNATION-FLOWERED POPPIES in 12 distinct colours, 1s. 6d.	
851	A COLLECTION OF PÆONY-FLOWERED VARIETIES OF POPPIES in 12 distinct colours, 1s. 6d.	
852	A COLLECTION OF RANUNCULUS - FLOWERED POPPIES in 6 distinct colours, 1s. 6d.	
853	Pelargonium, Fancy —The choicer. Mixed. 1½ ft. 1s. and 2 0	
854	— French Spotted —2 ft. 1s. and 2 0	
855	— Gold Bronze —1½ ft. 1s. 6d. and 2 6	
856	— Show —The finest large flowering sorts. Mixed. 2 ft. 1s. and 2 0	
857	Pelargonium, Zonal —Without doubt we have the finest and best collection of Zonal Geraniums in the world. We can confidently say the seed offered is far superior in quality to any other yet introduced to the public, and cannot fail to bring forth some startling improved varieties, as it is carefully hybridized with only the very choicest kinds. 2 ft. ... 1s. 6d. and 2 6	
858	Pentstemons, Large-Flowered —Saved from our own Catalogue collection, which embraces all the best up to the present, and cannot fail to produce flowers of superior quality, hp... 6d. and 1 0	
859	— Murrayanus —Rich scarlet, hp, 2 ft. 0 6	
860	Perilla Laciniatus Atropurpurea —Darker than <i>Nankinensis</i> , and finely laciniated, hha, 1½ ft. ... 3d. and 0 6	
861	— Nankinensis —A distinct and useful ornamental plant; leaves dark reddish mulberry, hha, 1½ ft. ... 3d. and 0 6	

PETUNIA GRANDIFLORA FIMBRIATA INTUS AUREA.

PETUNIAS—It is surprising this family is not more largely grown, considering how easy they are to cultivate, and if well grown what grand things they are, both for decoration and exhibition. Treat them similar to a Verbena.

862	Petunia Hybrida "Giants of California" —Most of the flowers are exquisitely fringed on the edges and are very large, the colours are rich and gorgeous, and others of lovely delicate shades, mixed, hhp 1 6
863	— Grandiflora Fimbriata, Single —Flowers of great size; beautifully veined, hhp 1 0
864	— Fl. Pl. —Large-flowering, double-fringed, hhp, 1s. 6d. and 2 6 As in all double flowers from seed there is always a certain percentage of single or semi-double flowers obtained, in Petunias the same rule applies, and especial care should be taken of the smallest plants.

PETUNIA, ROSY MORN.

	Per pkt.—s. d.
865	Petunia Hybrida —Finest mixed for bedding, hhp 0 6
866	— German Empress —Beautiful bluish shades and purplish veining; of enormous size, hhp 1 6
867	— Large-Flowered, Fringed, Miranda —A close approach to a scarlet Petunia, superbly fringed, ha 1 0
868	— Hybrida Nana Compacta (Dwarf Inimitable)—Brilliant cherry-red, and each one is marked with a regularly-formed white star, hhp 6d. and 1 0
869	— Rosy Morn —Fairly dwarf; flowers brilliant rose, with a large white throat and centre, hhp ... 6d. and 1 0
870	— "Snowball" —Satiny white flowers, adapted for bedding and pot work, hhp 6d. and 1 0
871	— Grandiflora Fimbriata Intus Aurea —Large-sized flowers, fine form, with a broad and deep yellow throat, hhp 1 0
872	Phacelia Campanularia —Flowers of the finest deep gentian satiny blue, ha, 1 ft. 0 6
873	Phormium Tenax (New Zealand Flax)—Used as a sub-tropical plant outdoors during the summer; very ornamental, sp, 5½ ft. 0 6

PHLOX DRUMMONDII GRANDIFLORA.

These comprise the most brilliant colours imaginable; the flowers are larger than those of the older kinds, and of finer substance, hha.

Sweet Alyssum—See *Alyssum maritimum*.

Sweet Sultan—See *Centaurea odorata*.

Sweet William—See *Dianthus Barbatus*.

CANNELLS' GOLD MEDAL SWEET PEAS.

SEVERAL ACRES UNDER CULTIVATION.

We devote much time and attention to the cultivation and selection of this indispensable and sweetest of all flowers.

They are of easy cultivation and thrive almost anywhere, and if sown early ensures still greater success and certainty. So as to obtain the largest and finest blossoms a trench should be opened about 1 foot deep, and put in 3 inches of well-rotted manure, followed with 4 inches of soil, and well incorporate or mix, then proceed to sow the seeds over this, 3 inches apart along the row, and covering with earth to the depth of an inch. This should be done as early as the ground can be conveniently prepared in the spring, and as the young plants grow, fill up the trench around them with good soil.

SWEET PEAS.

CANNELLS' CHRYSANTHEMUMS.

AWARDED MANY GOLD MEDALS. SILVER-GILT MEDAL, GHENT.

Of these we have the largest, finest and best kept collection in the world. For full particulars send for our Catalogue, post free.

STRAWBERRIES.

What a lovely refreshing fruit! And when we hear it is the firm belief of the highest in the medical profession that if we were to eat more we should hear less of gout, rheumatism, and other pains; and seeing how easy Strawberries are to grow, it should be the set determination of all to cultivate their own, and have them, with all their beautiful freshness, morning and evening, as long as possible; and when so, they are one of the greatest charms and benefits that mankind can partake of. *For full particulars send for our "Autumn Guide."*

PLANTS AND SEEDS FOR ABROAD.**FOREIGN PARCEL POST RATES.**

Australia, 6d. per lb. (1s. for the first lb.)

Canada, 3 lbs., 1s.; 7 lbs., 2s.; 11 lbs., 3s.

PELARGONIUMS, French Spotted and Decorative—

Our selection, in 60's, 6s. per doz.; in 5-in. pots, 12s. per doz.

A FEW POINTS WORTH ATTENTION.

FREE CARRIAGE OF SEEDS.—We send all Vegetable and Flower Seeds carriage paid to any place in the United Kingdom, excepting Peas and Beans, Potatoes, Artichokes, and special quotations, when any or all of these are ordered in small quantities, as in many such cases the carriage nearly, if not quite, absorbs the value of the goods.

Potatoes and Sundries, &c., are only sent free if the value amounts to 20s. in England, and 40s. in Scotland and Ireland, and upwards, when we send the whole carriage paid. We do not pay carriage on Pot Plants, Trees, Shrubs, or Bulbs; but extra plants, &c., are added gratis in lieu of carriage.

EMPTY PACKAGES.—We charge at cost price, and allow two-thirds price if returned in good condition and *carriage paid*, and must be in all cases accompanied with sender's name and address and advised by post.

Although every care will be taken in the packing and sending of plants, seeds, &c., risk of every description must be borne by the purchaser immediately they are delivered to the Railway Company or Postal Authorities.

Every article is charged at the very lowest price. Our object is to give the ready-money buyers the advantages they are really entitled to. It may happen that prices lower than ours may sometimes be quoted. This invariably means false economy in a variety of ways—good things must be looked after by good men, who must be fairly paid, and good strains are only procured by unceasing labour and care.

Full instructions as to the proper mode of forwarding must accompany each order, as it is calculated to expedite transit of goods, and saves vexatious mistakes. All goods are advised the same day as forwarded, and the invoice posted as soon as possible afterwards.

 Say by what rail. Please to write the address plain and in full on each order. No complaints entertained unless made immediately on receipt of goods.

The greatest care is exercised, and utmost liberality shown, when the selection of sorts is left to us.

It is particularly requested that all small orders under 10s. be accompanied with remittance to avoid the necessity of Booking, and very often the trouble of rendering and even re-rendering several times to our loss and probable annoyance to our Customers.

Cash with order is a sound way of doing business, and it enables us to give you advantages in our goods and also prices.

All Orders by Post will be dealt with precisely as if given personally. Those who send above their value will have additional put in to make up the full amount.

We have every facility for keeping a large stock of everything enumerated in this Catalogue, and are therefore determined to adopt the system of quick sale and ready money.

SEEDS AND BULBS FOR EXPORT—All these are specially selected for Export Orders, and carefully and securely packed in tin-lined cases. Plants in suitable boxes.

Our establishments are open for business, &c., from 6 o'clock a.m. until 6 p.m., and 5 o'clock p.m. on Saturday.

No visitors admitted on Saturday evenings and Sundays. Closed on all Bank Holidays.

Customers are particularly requested, when sending orders for friends (with their own), to do so on separate papers, with each address written plainly, to prevent mistakes.

 When Special Quotations are given, Customers are kindly requested to mention such. 

To avoid delay and disappointment, all business communications must be sent direct to the firm, addressed to **H. CANNELL & SONS**, otherwise they will remain unnoticed.

Telegraphic Address: "CANNELL, SWANLEY." Telephone, No. 3, Swanley Junction.

Post Office and Postal Orders to be made payable at Swanley Junction, Kent, and crossed "& Co."

All Cheques to be made payable to **H. CANNELL & SONS**, and crossed Martin's Bank, Swanley, Kent.

Not as in co-operative societies, do we demand payment beforehand, unless from unknown correspondents, when satisfactory references to bankers, or some person already known, are equally acceptable. So as to encourage quick returns and but small profits, we allow 5 per cent. discount (excepting Collections of Seeds, which are strictly nett) on all payments made within 14 days of date of invoice, but after that date must be remitted in full. When special prices are quoted, accounts are payable one month from date of invoice and no discount. We cannot undertake to send a receipt for payments under 2s. 6d., unless the return postage is sent us.

We hope all customers will apprise us of change of address, thus saving the annoyance to them of redirection by postal officials; a halfpenny card would thus save us a shilling, and often pounds. Should any Customers not receive our Catalogues at the usual seasons of the year, we shall be pleased to send copies of same upon hearing from them. Many are lost in transit.

NOTICE.—We grow our own Seeds, and every possible pains taken, and the strictest attention is paid to have and supply every item as per Catalogue; but there are so many always anxious to rush into litigation for the sake of compensation for any trifle, and failures which may occur over which perhaps we have no control, that we are compelled to issue this notice:—

CONDITIONS OF SALE.—We believe that all Seeds, Bulbs and Roots sold by us are of the description and kind specified by us at the time of sale; but owing to the practical impossibility, in many cases, of being certain of this, we give no undertaking that such Seeds, Bulbs or Roots will correspond with the description under which they are sold, and we make all sales subject to this condition. We further give no Warranty, express or implied, as to their growth, description, quality or productiveness, and will not be in any way responsible for the Crop. If the Purchaser does not accept the goods sold to him on these terms, they are at once to be returned to us. (These conditions will be found in all Seed Catalogues.)

We have received intimation from the various Railway Companies that for the future they will not pay any claims for damage or delay of goods sent at "Owner's Risk" rates; we therefore beg to inform our customers that our responsibility ceases as soon as goods are delivered into the hands of the Railway Company, and, in justice to ourselves, we cannot supply otherwise than on these conditions. All goods forwarded at "Owner's Risk" effect a great saving in cost of carriage, and which we consider of great interest to our patrons; we shall therefore continue to dispatch parcels at "Owner's Risk" unless specially requested to forward them at "Company" Risk.

Last but not least, buy "Cannells' Golden Seeds."

Come and See

Our Fruit Lands at Eynsford during the Fruiting Season, and inspect the trees bearing extraordinarily fine fruit, and if any of our customers decide to plant we request a trial order.

Distinct sorts coming in for use at different seasons, fine bush trees to produce a crop in a year or two, similar to engraving, 6 for 7s. 6d., 12 for 14s., our selection.

Packing, 1s. 6d. and 2s.

"GARDENERS' CHRONICLE" (Leading Article).

To show what the Old Country can do in the way of Apples and Pears Messrs. Caunell exhibited tables of fruit, against which even those of Nova Scotia paled in comparison.

"GARDENERS' CHRONICLE."

BRITISH AND COLONIAL FRUIT.—When at the recent Exhibition of Home and Colonial Fruit at the new Hall, the Fruit and Vegetable Committee awarded Messrs. H. Caunell & Sons a Gold Medal for their very fine display of home-grown Apples, it was desired not only to mark the Committee's sense of the great excellency of the exhibit, but also as an acknowledgment of the enterprise of the firm in exhibiting at such a show such superb examples of British-grown Fruit. Most certainly it would have been a misfortune had the public patronising the Show had no opportunity to note the merits of home-grown fruit when compared with that from our Colonies. That Kent County comprises an area from which come the finest Apples and Pears in the world is certain. North America may paint her fruit with richer hues than even Kent can, but not only are our fruits finer, but in quality they are greatly superior. When there seems to be so much desire to extol the productions of the Colonies at the expense of home productions, it is needful to make an occasional bold stand in favour of our little Britain.—A.D.

Kent has been acknowledged for centuries the Garden of England, and is to-day more manifest than ever. H. Cannells' establishments are situated in the midst of the largest fruit and vegetable market gardens in England. In consequence of the high quality of the goods being produced on the most favoured spot, Cannells' are universally known throughout the civilised parts of the world as supplying the best seeds and plants in the most perfect condition.

Gardeners.

Our Mr. H. CANNELL, Senr., gives personal daily attention to all applications for Gardeners (good all-round men); his wide connection, and being a large employer makes him either personally or intimately acquainted with most of the best practical and deserving men in the country, and he would feel a real pleasure in assisting and fitting in the right man to fill the situation for which any lady or gentleman may require him.

CANNELL'S SEEDS

FOR ABROAD.

Judiciously Selected, Specially, Carefully and Securely
Packed for Exportation to all parts of the Globe.

OUR FOREIGN TRADE.

We have so perfected the system of sending plants and seeds into the most remote parts of the world that success is no longer an uncertainty, which the many testimonials confirm.

TO ALL PARTS OF THE WORLD BY POST, RAIL AND SEA.

H. CANNELL & SONS

(Members of the Royal Horticultural Society of England).

Importers and Exporters of all New and Choice Plants, Florists' Flowers and Seeds, to and from all parts of the World.

FOREIGN AND COLONIAL NOTICES.

Plants and Seeds are despatched to India through the Indian Parcel Post, and also by the Ordinary Mail. Customers will kindly notify by which service they wish their parcels sent.

In America, Australia, India and Cape Town, the general expression amongst both the trade and amateurs is—"None are so successful in exporting plants as Cannell & Sons"; consequently, we need hardly say our trade has increased to a very great extent.

When Soft-wooded Plants are received abroad, if dry, let them lie in milk-warm water for three to six hours, without removing the packing from the roots; then unpack and put in pots, according to size, place in a close glass case, being careful to shade from the sun until they make fresh growth.

All orders must be fully prepaid or accompanied by satisfactory reference.

EXPORT ORDERS COMMAND THE PROMPTEST ATTENTION.

SPECIAL TERMS TO SHIPPERS FOR LARGE QUANTITIES OF SEEDS.

CANNELLS'

Plant, Fruit and Flower Manure.

An essential aid to Nature and Greater Perfection.

(SPECIALLY PREPARED AND ALWAYS RELIABLE.)

TREBLE YOUR PRODUCE—QUALITY AND QUANTITY COMBINED.

**For GREENHOUSE PLANTS, FOLIAGE and FLOWERING PLANTS, ROSES,
VINES, FRUIT TREES, VEGETABLES, FLOWER GARDENS, and LAWNS.**

ALWAYS AN ABUNDANCE OF FLOWERS.

The properties of this Manure go direct to make Flowers, Fruit, and Plants more brilliant, larger and finer, without the gross foliage. After one gets used to it they will soon gauge the exact strength that is necessary for any plant desired to have extra fine, the great thing is not to over apply it, but, if used with discretion, this is the most convenient and valuable of all Manures—its effect in a fortnight is marvellous—and those who use it double their produce. We have several who leave us standing orders for large quantities to be sent at stated times. All are charmed with its results, no greenhouse or garden ought to be without it, and for all who wish to be first at exhibitions, it is absolutely necessary. Every shilling so expended gives another in return, and often two.

DIRECTIONS FOR USE.

For LAND IN GOOD CULTIVATION AND GROWING CROPS.—Three-quarters of an ounce to the square yard, one and a half cwt. to the acre. Mix with treble its quantity of fine, slightly damp soil, and scatter it regularly; you can see to a line how far it has been put.

For POOR LAND AND POTATOES.—Four to six cwt. to the acre.

For POTTING.—One ounce to the bushel of good compost, and thoroughly mix.

TOP DRESSING.—Two ounces to a bushel of good soil.

LIQUID MANURE.—Half ounce to a gallon of water, and increase it a little twice a week until the plants are well in flower.

For LAWNS—Scatter broadcast at the rate of one and three-quarter ounces to the square yard, afterwards to be well watered.

DOUBLE production of everything is obtained by using it. Nothing is so important in every part of the garden as two or three applications during the season. It gives more than satisfaction. A 1-lb. tin will show its effects and guarantee its general use.

**1-lb. tins 1s., post free 1s. 4d. ; 3 lbs. 2s. 6d., post free 3s. ; 7 lbs. 4s., post free 4s. 8d.
In bags, 14 lbs. 6s. ; 28 lbs. 10s. 6d. ; 56 lbs. 18s. ; 1 cwt. 30s.**

SPECIAL OFFER of FRUIT TREES, DECIDUOUS AND FLOWERING SHRUBS, CONIFERS AND EVERGREENS, &c.

BUSH OR PYRAMID FRUITING TREES.
